## U.S. County and City Rankings

---

The following graphs and listings demonstrate how the nine localities in the Roanoke Valley-Alleghany Region compare demographically with the rest of the nation. The data is based on 45 demographic indicators as reported in the U.S. Census Bureau's 2000 survey. Comparisons are made on three levels: national, statewide and metropolitan. This includes 3,141 counties and cities in the U.S., 135 counties and cities in Virginia, and the four counties and cities that comprise the Roanoke, VA Metropolitan Statistical Area (MSA), as defined during the reference week of the 2000 Census. The first section of this document presents a comparison between the U.S. and the commonwealth of Virginia. The second part ranks the Roanoke, Virginia MSA against other MSAs across the U.S.

Rankings are based on "counties and county equivalents." County equivalents constitute a number of geographic entities not legally designated as a county, but recognized by the Census Bureau as equivalent to a county for data presentation purposes. These include the boroughs, city and boroughs, municipality, and census areas in Alaska; parishes in Louisiana; and cities that are independent of any county (independent cities) in Maryland, Missouri, Nevada, and Virginia. They also include the municipios in Puerto Rico, districts and islands in American Samoa, municipalities in the Northern Mariana Islands, and islands in the Virgin Islands of the United States. Because they contain no primary legal divisions, the Census Bureau treats the District of Columbia and Guam each as equivalent to a county (as well as equivalent to a state) for data presentation purposes.

As of 2006, the Roanoke Valley-Alleghany Regional Commission oversees: Alleghany County, Botetourt County, Craig County, Franklin County, Roanoke County, the City of Covington, the City of Roanoke, the City of Salem, the Town of Clifton Forge, and the Town of Vinton. During the reference week of the 2000 Census Clifton Forge was treated with City status but as of 2001 has reverted to Town status. This change stipulates the exclusion of the Town of Clifton Forge from localities listed in the 2010 Census.

## Definition of Terms

---

**Ability to Speak English:** Represents a person's own perception about his or her ability to speak English, or because census questionnaires are usually completed by one household member, the responses may represent the perception of another household member.

**Average Household Size:** Refers to the average number of persons residing within a household in a particular area. It is computed by dividing the total population in households (excluding group quarters) by the total number of households in that area.

**Contract Rent:** Monthly rent agreed to or contracted for, regardless of any furnishings, utilities, fees, meals, or services that may be included. For vacant units, it is the monthly rent asked for the rental unit at the time of enumeration. If the contract rent includes rent for a business unit at the living quarters occupied by another household, the respondent was instructed to report that part of the rent estimated to be for his or her unit.

**County:** The primary political and administrative subdivision of a state.

**County Equivalents:** Constitutes a number of geographic entities not legally designated as a county, but recognized by the Census Bureau as equivalent to a county for data presentation purposes. These include the boroughs, city and boroughs, municipality, and census areas in Alaska; parishes in Louisiana; and cities that are independent of any county (independent cities) in Maryland, Missouri, Nevada, and Virginia. They also include the municipios in Puerto Rico, districts and islands in American Samoa, municipalities in the Northern Mariana Islands, and islands in the Virgin Islands of the United States. Because they contain no primary legal divisions, the Census Bureau treats the District of Columbia and Guam each as equivalent to a county (as well as equivalent to a state) for data presentation purposes. In American Samoa, a county is a minor civil division.

**Employed:** All civilians 16 years old and over who were either (1) "at work" – those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family owned business; or (2) were "with a job but not at work" – those who did not work during the reference week but had jobs or business from which they were temporarily absent.

**Family:** The term "family" refers to a group of two or more persons related by birth, marriage or adoption and residing in a household together.

**Family Household:** A single housing unit that is occupied by a family. A family household may include non-relatives living with the family.

**Family Income:** The combined gross money income of all members of a family living within the same household.

**Foreign Born:** All people born in countries not including – the United States, Puerto Rico, or outlying areas of the United States – and those who were born overseas but have at least one American parent.

**Gross Rent:** Monthly contract rent plus the estimated average monthly cost of utilities and fuels, if these are paid by the renter.

**Gross Rent as a Percentage of Household Income in 1999:** A computed ratio of monthly gross rent to monthly household income.

**Hispanic Origin:** People who identify with the terms "Hispanic" or "Latino" are those who classify themselves in one of the specific Hispanic or Latino categories listed on the Census 2000 or ACS questionnaire – "Mexican," "Puerto Rican," or "Cuban." It also includes people who indicate that they are "other Spanish, Hispanic, or Latino." Origin can be considered as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as "Spanish," "Hispanic," or "Latino" may be of any race.

**Household:** A person or group of people who occupy a housing unit as their usual place of residence. The number of households equals the number of occupied housing units in a census.

**Household Income:** The combined gross money income of all persons who occupy a single housing unit. Household income differs from family income in that the former includes the income of every person living within a single housing unit, whether they are related or not. Family income, in contrast, is based on the combined income of only those persons within a household who are related to the householder.

**Housing Unit:** A single-family house, townhouse, mobile home or trailer, apartment, group of rooms, or single room that is occupied as a separate living quarters or, if vacant, is intended for occupancy as a separate living quarters. See separate living quarters.

**Housing Value:** A homeowner's estimate of how much his or her property (house and lot, mobile home and lot, or condominium unit) would sell for if for sale.

## Definition of Terms

---

**Labor Force:** Defined as all persons 16 years of age and older who are employed (includes all members of the Armed Forces), or unemployed but actively seeking employment and available to accept employment.

**Language Spoken at Home:** The Census Bureau classifies as speaking a language other than English those persons who that they “sometimes” or “always” speak a non-English language at home (excluding those who speak a language other than English only at school or at work, and those who speak only a few expressions or slang in a non-English language.)

**Mean Travel Time to Work:** The average travel time in minutes that workers usually took to get from home to work (one-way) during the reference week.

**Median:** The middle value in a set of numbers.

**Native:** Includes persons born in the United States, Puerto Rico, or an outlying area of the United States. The small number of persons who were born in a foreign country but have at least one American parent also are included in this category.

**Non-family Household:** Consists of a householder living alone or with non-relatives only.

**Per Capita Income:** The average income available to each person residing in an area. It is calculated by dividing the total personal income earned by every person residing in an area by the total population.

**Roanoke Valley and Alleghany Region:** South Western section of the Commonwealth of Virginia comprised of five counties (Alleghany, Botetourt, Craig, Franklin, and Roanoke), three independent cities (Covington, Roanoke, and Salem), and two independent towns (Clifton Forge and Vinton).

**Poverty Index:** Constitutes an official federal government estimate of the minimum amount of income needed to meet the essential living requirements based on the household size and composition. Poverty income cutoffs are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index. The income cutoffs used by the Census Bureau to determine the poverty status of families and

unrelated individuals included a set of 48 thresholds arranged in a two-dimensional matrix consisting of family size cross-classified by the presence and number of family members under the age of 18 years of age. Poverty status is determined for all persons except institutionalized persons, persons in military group quarters and college dormitories, and unrelated individuals under 15 years of age.

**Race:** The concept of race as used by the Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The data for race represent self-classification by people according to the race with which they most closely identify.

**Selected Monthly Owner Costs:** the sum of payments for mortgages, deeds of trust, contracts to purchase, or similar debts on the property; real estate taxes; fire hazard, and flood insurance on the property; utilities; and fuels. It also includes monthly condominium fees or mobile home costs when such fees are paid.

**Standard Metropolitan Statistical Area:** A large population nucleus and nearby communities that have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties and metropolitan character.

**Tenure:** The status of an occupied housing unit as either owner-occupied or renter-occupied.

An **owner-occupied** housing unit is one in which the owner lives in the unit (even if the unit is mortgaged).

A **renter-occupied** housing unit refers to one that is not occupied by the owner.

**Units in Structure:** A separate building or structure that has open spaces on all sides or is separated from other structures by dividing walls that extend from ground to roof. In determining the number of units in a structure, all housing units, both occupied and vacant, are counted.

**Vehicles Available:** the number of passenger cars, vans, and pick-up or panel trucks of one-ton capacity or less kept at home and available for use by household members.
