

ROANOKE VALLEY AREA METROPOLITAN PLANNING ORAGNIZATION

Demographic Profile Mapping Update

FY 2007-2008

Introduction

In FY 2007, the RVAMPO reviewed 2035 projections for population and employment in each of the region's Traffic Analysis Zones (TAZ). As a part of this process, the MPO study area boundary was reviewed and adjusted accordingly. The study area boundary should include all areas that are expected to be "urbanized" within the projected time frame. The area must also include all areas that were "urbanized" as of the 2000 Census. This required several adjustments, most notably the MPO had to add several areas in Bedford County that were previously not a part of the MPO study area.

In FY 2008, as a part of its regular public involvement and environmental justice planning processes, the RVAMPO set out to update the RVAMPO Demographic Profiles with updated maps to reflect the new 2035 RVAMPO Study Area Boundary.

Demographic Mapping

The following seventeen maps are updated to the new 2035 Study Area Boundary. The RVAMPO demographic profile shapefiles have been updated accordingly and have been included in the RVAMPO staff GIS data database for future planning activities.
