Introduction

The annual Comprehensive Work Program is the basis for achieving the objectives and strategies outlined in the Roanoke Valley-Alleghany Regional Commission's Strategic Plan. The Commission strives to maximize its limited staff and resources by developing a comprehensive work plan based on current and anticipated needs and priorities of the region, while providing flexibility to take advantage of opportunities as they arise over the year.

Projects are submitted by Commission members, local Chief Administrative Officials, staff of planning and economic development departments of member governments, and generated internally by Commission staff. From time to time, projects submitted by regional organizations or nonprofits may be considered on a fee bases or under one of the Commission's existing funding sources as approved by the Commission and impacted member government(s).

To meet State and Federal requirements several program areas are required to have specially formatted work programs which are also submitted and approved separately from the RVARC work program. While these work programs are separate documents, a summary of their activities are included in this document for reference.

How Projects Get into the Work Program

Projects enter the work program a variety of ways, through initiatives identified by staff and approved by the impacted local governments, to formal submissions from locality administration or state agencies. Many projects enter the work program during the January through March period of each year, aligning with Commission and locality budgeting timelines. Project ideas may also arise throughout the year through Commission meetings, our Chief Administrative Officer luncheons, and our quarterly Planner's Lunches. Commission staff seek to be proactive in identifying issues of regional significance, with a particular focus on leveraging local planning resources towards larger Federal implementation programs like DOT's RAISE grants, ARC's ARISE grant, and EDA Economic Adjustment Assistance.

While the Commission does its best to identify its annual scope of work before the start of the fiscal year, we recognize that needs change throughout the year through unexpected changes and opportunities. The Work Program is intended to be flexible enough to respond to these needs, with sufficiency general technical assistance built in to field requests throughout the year, and the capacity to reschedule or change the scope of projects as necessary to free up resources.

Strategic Priorities

The Roanoke Valley-Alleghany Regional Commission has identified its Comprehensive Economic Development Strategy (CEDS) plan as the organization's strategic plan. In addition, the Commission completed a strategic planning effort in 2019 that identified several goals focused on communications, improving staff capacity, and strengthening the organization.

It is the intention for the Commission to undertake an updated comprehensive strategic planning effort in the coming years. In the interim, the strategic goals for this work program are derived from both the CEDS and the 2019 Strategic Plan.

Our strategic priorities are as follows:
