

## Annual Listing of Transportation Project Obligations

# **Federal Fiscal Year 2022**

(October 1, 2021 to September 30, 2022)

## December 2022

The information presented in this document is provided by the Virginia Department of Transportation and the Virginia Department of Rail and Public Transportation. The Roanoke Valley Transportation Planning Organization has reorganized the projects by locality for ease of reference. The original spreadsheets developed by VDOT are included in the appendices.

APPENDIX A: Ungrouped Projects	

**APPENDIX B: Grouped Projects** 

### **DOCUMENT DESCRIPTION**

The Roanoke Valley Transportation Planning Organization (RVTPO) Transportation Improvement Program (TIP) is a listing of transportation projects, which will be funded during the specified four-year timeframe.

The current TIP covers the years 2021 through 2024 and lists the estimated total cost for each project to be funded at least in part during that time period. The TIP includes all regionally significant projects receiving Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) funding and non-federally funded regionally significant projects that are consistent with the Roanoke Valley Transportation Plan. To ensure that the public will have an accurate understanding of how federal funds are actually being spent on transportation projects, Congress included in the 2015 Fixing America's Surface Transportation Act (FAST Act) a requirement that the organizations responsible for approving the Transportation Improvement Program publish an Annual Listing of Transportation Project Obligations.

Costs for grouped highway projects in the current TIP are reflected as a total cost estimate. Such is the same for the original project sheets provided by VDOT that can be found in the TIP's Appendix B. Ungrouped highway projects, found in the TIP's Appendix A, show planned obligated amounts over the four-year period. All transit projects are ungrouped and show planned obligations.

#### What are "project obligations"?

An **obligation** is the Federal government's legal commitment to pay the Federal share of a project's cost. An obligated project is one that has been authorized by the Federal agency and for which funds have been committed. Projects for which funds have been obligated are not necessarily initiated or completed during the program year, and the amount of the obligation will not necessarily equal the total cost of the project. For projects under the auspices of the FTA, obligation occurs when the FTA grant is awarded. For projects under the State/grantee requests that the funds be obligated.

A good way to think of "obligations" is setting up a checking account for a specific purpose and then making an initial deposit. To begin work on any phase of a transportation project, federal funds must be obligated. This means that the money is set aside for that particular piece of work, and then can be used to pay bills. The project expenses may be bills from a design consultant, a construction contractor, or payroll costs for Virginia Department of Transportation (VDOT) employees working on the project.

An obligation removed from a project, or **released**, is usually the result of a decrease in the cost estimate, a project awarded for a lesser amount than originally authorized at advertisement, or an FHWA Financial Integrity Review and Evaluation (FIRE) project level review.

#### Do project obligations mean the work is underway?

This is not always the case. Project accounts are set up, particularly for the initial phases of a project, to enable the work. It may take a while, for example, to select and hire a design consultant and then actually begin work.

#### Contents of this document:

This document contains tables of roadway/bicycle/pedestrian project funding information which is organized by jurisdiction then by ungrouped project by roadway system (i.e. Interstate, Primary, Secondary, or Urban) followed by grouping categories of projects for which planned obligations are not tracked by the RVTPO but actual obligations are provided in this document. The grouping of projects allows flexibility to make funding adjustments more easily to minor projects that don't merit the need for extensive oversight and public involvement thus reducing paperwork. Projects that are not considered to be of appropriate scale for individual ungrouped identification in a given program year may be grouped by function, work type, and/or geographic area.

Appendix A shows the FFY22 actual obligations for ungrouped projects organized by roadway system (i.e. Interstate, Primary, Secondary, or Urban) followed by jurisdiction. Ungrouped projects include grouping categories of projects for which the individual projects within each group and their actual obligations in FFY22 are presented in Appendix B. This document also provides funding information showing how federal funds are being used to support transit capital and operations by transit provider in the Roanoke Valley.
