**Question 9: What factors would encourage you to increase the amount of money you spend LOCALLY on bicycling-related items?**

Better prices, wider selection

weather, spare time, availability of areas to ride

more bike related shops in the Salem area and more places to bike in the Salem area where there is pavement but no car traffic

more competitive pricing

Bicycle venues on the greenways. More bicycle events in the valley.

Greater selection; current retailers have too little inventory, selection Seasonal sales and advertising thereof

None try to ride as inexpensively as possible. Safety is number one. Try to protect myself from injury.

more info about/from local cycling shops and bike clubs

Ease of reaching these locations by public transportation or bicycle. Variety of products offered. Demonstrations of various products, e.g., lights for night time riding.

If I became more active, join club, etc

I would need to ride my bike more often.

If I could ride my bike to Virginia Western Community College, places on Brambleton, and to the Grandin area safely, I would ride a lot more. Therefore I may even buy a new bike, and the increased use would make me buy new parts etc.

More bike paths.

wider selection of women's clothing

more available routes

A shop close to my home or workplace

Expanded greenway system.

Using my bike more on bike-friendly roads (roads with a bike lane) and the Greenway.

I try to buy all my bicycling needs from local dealers.

Ease of availability... recently I found out that the sports beverage that I like will be harder to get because a local grocery store is closing. My income also plays a major role.

better / safer / more convenient riding opportunities in local area

nice bike paths, bike lanes on the roads with-in the city, more wooded trails for riding

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

<p>Safer area for bikers to ride. There needs to be a barrier between bikers and motorized traffic. I mainly stick to mountain biking now because I don't have to worry about motorized vehicle traffic. In years prior to the introduction of the cell phone I use to ride long distances on the roadway. But now most motorized are paying attention to their cell phones, text messaging, or gadgets in their cars and aren't paying attention to the road ahead. It just isn't worth risking your life to ride on the road.</p>
<p>Becoming less lazy and riding more, thus requiring more bike parts</p>
<p>More bike trails throughout Roanoke County and the City of Salem</p>
<p>Improvements in the trail networks would increase the mileage I can put on my bike and in turn I would purchase more equipment from bike shops to maintain items such as tires, brakes, etc... Currently, I understand the strategy has been to build segments of greenways/bike paths to allow opportunities for different areas to receive some benefit of a trail. The current system is very fragmented and does not provide the best opportunity for a full commute or challenging exercise. I suggest the focus should be on completing the backbone along the Roanoke River and next on spurs that would serve the largest populations. I understand that dollars are limited and believe that the staff has done a great job managing what resources we have to date.</p>
<p>More events for everyday working people that are not professional riders. The big bike rides are intimidating to a non-professional rider. More family events that include the younger riders as well.</p>
<p>my time is the only factor for limiting my bicycling activities</p>
<p>Area bike shops do not carry a great deal of variety in terms of brands, models or sizes. Additionally, local shops tend to set prices at a level that encourage consumers to go elsewhere to make purchases. Helping either of these factors or establishing some sort of loyalty programs could help drive more purchases locally.</p>
<p>Price</p>
<p>Increased Greenways and Bikeways</p>
<p>If I felt that there was an adequate bicycle network (bike lanes, Greenways that can be used for commuting rather than excursive and recreation) in Roanoke so that I could cycle to places instead of using my car. FYI - I live very close to places that I would GLADLY ride my bike to but will not because I must get on busy roadways without bike lanes, shoulders or sidewalks.</p>
<p>None, I buy whatever I need for repairs and maintenance on my townie or mountain bike as the needs arise. I typically buy a new mountain bike in the \$3000 range every four years, although I don't upgrade my townie unless its stolen.</p>
<p>A Performance Bicycle Shop in Roanoke</p>
<p>More bike shops and services on my main routes</p>
<p>nothing</p>

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Bikes are cheaper. Items are cheaper packs for sale that are created to have everything you need for a bike ride. i.e. energy bar, water, food, sports drinks all in a pack ready to go. But it needs to be cheaper than buying the items separate and the drinks have to be in a reusable container to help the environment.
Bike shop closer to my home
Fees to park my bicycle, or the need for major repairs or overhaul to my bike, would cause me to spend more locally.
better job
Flat tires, repairs
Affordability, Availability of second hand items
Bigger selection, more bike stores in Roanoke
The local places having lower prices, and more inventory. Also deals like combo's and such. These could consist of stuff like buy a helmet and get 20% off gloves type of thing.
more bicycle lanes would increase my frequency of use
I only buy necessary items, and I buy them locally if they are available.
More bike trails within the city
better, competitive pricing
more clothing options for women in particular
Wife working!!!
None
None. I ride a bike in part to save money not to increase the amount I spend.
More bicycle races in Roanoke.
Having more convenient and further reaching bicycle paths.
Certainly the ability to use the bicycle on a daily basis. Wear and tear on the bike would require additional expenditure. Also, clothing for all weather occasions would require additional expenditure.
Competitive prices and increased selection and delivery
If I had the opportunity to ride my bike more (say from home over on Colonial Ave. over to work at Valley Pointe). The more you use it, the more likely you are to increase the amount of money spent.
better prices
I buy my cycling needs at the local shops as much as possible even if they need to order it.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Sufficient on-street bicycle accommodations that allow me to commute in all seasons, including after-dark winter commutes, would encourage me to purchase light systems and other winter commuting gear. The absence of a prominent bike commuting culture in the Roanoke area limits the amount of commuting gear that local bike shops are willing to stock.

On line catalog or listing of sale items

That depends.

Better prices and services

Better infrastructure

Sales of bicycle equipment and clothing

More bike shops with lower prices and an accommodating bike culture that includes bike lanes, friendly drivers, friendly Park rangers on the Blue Ridge Parkway. Bike shops with fewer racer-heads and staff more inclined to the average person.

Better selections of bike clothing and accessories, like packs and lights.

Needs

Wider bike lanes. It's too dangerous to bike around Roanoke.

Bigger Bike shops in the area. None carry a lot of gear besides bikes. Bike Rentals would be a great thing too!

???

More selection, more bike shops, and sales people not trying to charge me \$80 for a part I know I can get for \$20 online.

Getting the new bike I've been hoping to buy!

Better discount prices--not much can be found to match or top Performance.

GOOD SELECTION AND PRICE.

availability, price

Better service, better product selection, better pricing.

Not enough time in my busy schedule to get out on the bike.

More shops with a greater range of goods

Riding more - The more you ride, the more supplies you need.

I spend based on necessarily, so my bike's condition dictates how, when, and where I spend money on it.

More bike trails and greenways

The availability and reasonable cost of items when encourage me to spend more money.

A good (better than what's available) bicycle shop

convenience

Selection. Some items are bought used on eBay.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

More trails and retailers carrying bike related items. Advertising for bicycle rights and safety.
More clothing choices
I always try to buy local. Support our local shops that support our sport locally.
Cost
A bike shop like performance bike that is mostly parts that are sold for very good prices. I just feel when you go to a bike shop here it is all bikes and not a very big section for do it yourself people. I also feel that the cost for tune ups here is extremely high compared to bigger cities.
Better Prices
I would spend more if I increased the amount of time that I dedicate to riding.
# of mechanical failures and flat tires.
The ability to ride in areas that are safe, i.e. pathways or bike lanes. I used to ride to Kroger @ Towers Mall until the bike lane on Colonial Avenue was removed during the recent construction at the intersection of Wonju & Colonial.
Bike Lanes, Bike Parking, Driver Awareness
Easier access to store by bike, a shop on a green way with food or drink
More bike friendly riding areas.
Security and visibility of bike storage locations within downtown.
safe to ride, i.e., bike lanes, etc.
If I had more money... If I sold my car
Network of safe bikeways that actually take you places you want or need to go.
Friendlier roads, better work environment (i.e.: Place to shower etc)
More surfaced Greenway trails.
More daily biking opportunities
Being able to ride more will mean I need to spend more! More bike paths! Please!
Wider roads with bike lane. Speed limit (45 mph) actually enforced on the Blue Ridge Parkway. More off road trails for Mtn bikes.
Better selection and lower prices at local bike shops. Bike shops that focus on items other than high-end bicycles.
Local events, more trails, shops, Roanoke related cycling clothing, gravity events, more trails.
Off the top of my head there are no known factors to encourage me to increase my local spending.
The wife letting me get a fancy new bike.
Greater bicycle access to shopping centers. This means bike lanes on all major roads in Roanoke County and Roanoke city.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

More inclusive bike shops, where you can find a better selection for commuting accessories such as, bells, baskets, bags, casual clothing, etc. Fund raising events for bicycle advocacy or programs, ex; music/beer festivals, races (like gallops for greenways, I like that), weekend rides or bike tours (like the tour of vine)
More bicycle friendly city.
More safe biking trails closer to my home.
more sponsored events
Not a lot of gear is necessary to use a bicycle as your main form of transportation. Locally, bike shops seem to be focused toward a sportier cyclist community and less toward the community that uses bicycles as a form of transportation.
If local bike shops would match prices found on the internet
More shops on bike accessible roadways
For local prices to be competitive with Internet prices. Hands-on service provided at local shops is good.
More user friendly riding areas.
Participation in more organized activities
Decent bike shop with a good selection of in-stock components and commuter accessories.
better bike lanes so that I could ride more locally
Availability of items; sometimes you have to order online or non-locally to get what you need
Cheaper prices than the internet.
Safe riding areas in my home zip code. Now, there is NOTHING!!! The roads around here are not safe to ride a bike on.
better/safer place to ride
Entry fees for local (in Roanoke City and County) organized bike rides to benefit charitable organizations. The thing about in-towner's spending money is that once you have your bike and clothes, there really isn't much reason to spend more money except on bike maintenance & upgrades to your bike. I bought my new bike locally (@ East Coasters) in 08 and spent \$2,000. I buy all of my bike clothes on line because the local shops don't carry much in women's clothing. I try to make local purchases of other items: water bottles, energy drinks, tires etc.
Stores convenient to my work or home.
More access to be capable of riding. The more riding that I do, the more money I will spend for maintenance on my bikes
If I had a bike that would provide comfort to sit back more. Due to back injury, I can no longer ride a bike with my back hunched to the handle bars.
More selection.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I SPEND AN ABUNDANT AMOUNT OF MONEY IN THE VALLY ON CYCLING EVENTS. I RIDE EVERY WEEKEND AND NORMALLY EAT AT LOCAL RESTAURANTS. IF WE HAD MORE TRAILS IN THE AREA, LINKING THE CITY AND THE COUNTIES, WITH FACILITYS FOR DRINKS, FOOD, ETC ON OR JUST OFF THE ROUTE, THERE WOULD BE MORE CASH FLOW FROM CYCLISTS.

A store such as Performance

More local trails.

Most of what I spend on bicycling is done locally. However, bicycling doesn't cost a lot after the initial bike purchase...

Being able to bike to work without risking death.

More bike-friendly roads and greenways

I already have so much gear, etc that I don't need much. Lack of time is a problem also.

A save place and way to get to the locations.

More trails.

Safe commuter route from Bonsack to downtown Roanoke

having more disposable income

More bike friendly pathways or lanes.

More local events Performance Store in Roanoke Showers at the Mill Mountain Campground Nicer, bike friendly people at the Visitor's Center

Safe place to ride

A better paying job.

price selection

No factors come to mind. Most bike gear is overpriced and largely unnecessary.

Having more bike lanes to make riding safer....or greenways.

Flat tires.

Spandex failure

Better retail selection of bikes, parts and accessories.

Bike Trails

Not sure; part of what I love about bike-riding is NOT spending any money. :-)

Question 10: If you have children do they ride a bicycle to school? If no, briefly list why?
too far not safe
Too dangerous
six years old
Not school-aged kids yet.
N/A
Too young.
there is no safe way as we have to travel on Peter's Creek Road
Now adults
No kids at home
I do not have children, but every road near where I reside is incredibly unfriendly to bikes.
No children at home
Off road paths not available.
no children
No children
My children do not go to school.
too young
Safety! Both because of persons of questionable character and drivers who are not courteous and don't yield to bicyclist or pedestrians.
Children are grown
no children at home
n/a
We home school our children.
Sports activities after school that requires equipment.
out of area
No children
N/A (no kids)
There is no safe bike path between our neighborhood and the school.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

They are 5 and 7 years old and are just learning to ride a bike...age is too young to travel without adult supervision.
They are not in school yet, Pre-K but they ride their bikes at least 3 days a week. We encourage them to do it mostly for the exercise but also encouraging the enjoyment of the exercise.
no children
N/A
Not old enough to attend school yet
Roads to school do not offer paved shoulder or wide lane; specifically, Red Lane has narrow lanes and no shoulders in Roanoke County connecting to our neighborhood, yet there are hundreds of residential houses connecting to red lane in Roanoke county.
No Children
She doesn't consider it "cool" to ride a bike to school.
no children
More than 30 miles.
Young in age
She is not school age yet...but if she were, due to the lack of bike lanes, shoulders, and sidewalks from our house to the school (again a close enough distance for walking/biking) I would not allow her to do this.
No Children
would require going on main roads(peters creek)
Lack of interest - he does walk and may try riding this year
I don't have children
no children
According to rules - not allowed...
No children.
They are too young, and it's too far away.
too young
No safe routes, too far
No safe route
No children.
No children

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

too young
I can see the school from my house but the county does not allow walkers/bikers.
Two school principals and one school administrator have told me that they do not want to see kids riding to school on bikes. One of the principals said that her goal was for every child to arrive at school in a vehicle.
Absences of bike lanes to 2 of the schools and inadequate/unsupervised area to leave bike for the third school (Woodrow Wilson)
I do not wish my child to ride a distance on the street without me due to age.
No children
No children
Under age.
I do not have children.
No good route and too far.
School is too far.
My children are all grown.
Have no children
too young no infrastructure
They are too old now, but it never felt safe or realistic for them to do so with laptops, heavy book bags etc. Seems odd since I rode to school all the time!
No kids yet.
Too young... ages 4 and 1
No children
They live on Brambleton Ave. there isn't a wide bike land. They may die.
He rides the bus. He would have to cross route 419 to get to his school from our house and it is not safe.
My daughter is in 2nd grade and has ridden her bicycle to school accompanied by her father. Her route includes a busy intersection with 419. Roanoke needs more bike lanes and education for drivers regarding sharing the road with cyclists.
School is too far away around here. And where I grew up (Floyd County, VA)
Not in school yet.
Too dangerous to ride on the road in the neighborhood. Too hilly. Crossing major intersection to get to school--kids too young to do this at this point.

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Not in the area.
Too young.
No children
Roanoke City street not safe--motorists do not use caution in Garden City.
NO CHILDREN
no children
No. They are too young for school and it would be dangerous (live in rural Franklin County)
N/A
No children.
n/a
No safe bike lane
There are no safe bicycle lanes in our area.
Roads are too busy and dangerous.
Too dangerous, poor provisions for bicycles, poor law enforcement, too far at an early hour, poor drivers
no children
No children
I do not have children
Not convinced that the infrastructure exists for my son to safely ride to Woodrow Wilson. He certainly would if I let him.
Schools are not close enough and no safe passage.
no children
I do not have children
Actually, I have no children.
no children
too young
No safe bike access to their school
Not old enough
No there is not a safe path, 220 is too busy
No Children
not safe

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

because of traffic and no bike lane also distance
I do not have children
Adults
Not safe, would have to ride in the road.
She did in 5th grade, but not in 6th grade. She has a violin to carry.
roads not friendly
We do not live close enough. If we lived closer they could ride.
In one case, not safe as we live on a steep hill. In another case, too far (Bonsack to WBMS)
child no yet school age
both walk only .75 miles to school on greenway
Not old enough yet.
no children
No children
More convenient to put them on the bus.
No Children
Not old enough yet.
no kids
I don't consider Grandin Rd west of Murray Run trailhead to be bicycle friendly, especially for children
too young
Kids are in college
To dangerous
6.5 months is too young for school :)
NA
No children.
Too young. They will ride once they are in the 3rd grade.
distance
No children
no children in school
Not applicable - No children

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

No children
Roanoke County does not have safe shared use paths to their elementary & jr. high schools
Too far - ~12 miles from home
Not old enough to go to school
Virginia Western Community College too far away. The youngest one is 6 years old - too young & traffic is outrageous.
Too far, roads too busy, child only 11 years old.
The roads are dangerous and would YOU let YOUR kids ride alone around here?!?! Too many large/dangerous intersections where jerks run red lights.
NO CHILDREN
Not of the age yet to do so.
Youngest child now attending VWCC - no bike friendly route from our house
It would not be safe to do so.
This yes/no answer doesn't work for me since I don't have children.
Too young to attend school.
No children
Not safe, too much traffic.
No children
No safe route and distance
congested roads
NA
Too young.
Too young. No bike lanes and I feel it is not safe for the kids.
School too far from home and on a major highway
too young
Goes to school out of district. Too far to ride. Drives to school.
They walk/skateboard to school.
Too dangerous on main roads
across to many busy roads, colonial, 419 and Brambleton
Bus and dangerous roads

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

1) I have no children. 2) I wouldn't let young children ride in traffic. 3) I live 3 blocks from PHHS, so if I did have children, they could walk.

no children

Too young, but will ride to Crystal Spring in a couple of years.

Not school age yet

No kids.

**Question 18: If you currently commute by bicycle to work or school, why? Rank each reason on a scale of 1 to 5.**

"Bike to Work Routes" by RIDE Solutions was empowering and is an excellent tool. This was the catalyst I needed to select bicycling as an alternative mode of transport, as it revealed routes/greenways that I did not know existed and enabled me to bypass high traffic roads that otherwise would have kept me from commuting by bicycle at all. My routes still require some negotiation of high traffic areas without safe road margins for sharing the road, and would love to see the expansion of greenways and dedicated bike lanes.

There are no bicycle facilities along my commute from Salem to Roanoke - this is important to me but didn't know how to answer next to last in the list.

I ride my bikes for fun.

I don't own a bike

I currently ride the Smartway and have an extra car in Salem. I used to use the bicycle instead of the car, but when my work required me to carry things back and forth and I was required to dress more professionally, it became less convenient to bicycle to and from the park n' ride. However, I still wanted to provide input on the questions below. Before that I used to ride to work in Salem from Christiansburg several times a week and then ride the Smartway bus home.

If I could get access to a greenway I could. If the Roanoke River Greenway and some good spurs are completed I would strongly consider it.

I don't currently commute by bike

I currently catch the Smart Way Bus in Christiansburg and get off of the bus at the Exit 140 Park-n-Ride. From this point, I ride a bicycle to my place of work.

NA Retired

as stated before I work for the fire dept and I never know when I will be transferred due to vacancies

I do not commute to work/school by bike

I mainly work at home or with various schools on short notice; I cannot commute to work when I mainly work at home. This also applies to your next question, #19.

I have a live work site

On #19 below one other important reason (5) for not commuting is lack of time.

Currently I don't ride to work although would more than welcome the opportunity.

Avoids paying parking fees

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Don't commute to school or work
NA--don't bike to commute at this point
Don't commute
I plan on starting to bike commute next week when my wife begins to stay at home to watch our newborn twins. I've commuted in the past. The nicest thing is that my employer has showers (municipal building).
Retired
I'M RETIRED
I work from home, no need to commute
We take back roads including Mountain Pass Rd rather than Rt 11 to our mechanic for safety reasons. That is a LOT of extra distance and terrain for safety!
No shower/change facility at work. Would ride more often if there was one.
I would ride more often if I could shower at work once I got there, but my schedule is also weird so it would mean riding in the dark some mornings which I don't feel at all safe doing. I've ridden only occasionally so I'm doing both sections of the survey
I am a teacher and I want my students to see that there are options!
retired
I would be more than willing to bike the 8 miles each way to work at least 3 days a week. I have tried to map this out but have discovered that there isn't a safe way for me to go. Either there is no shoulder on the road for a significant distance or I would be crossing busy intersections.
I would like to be able to rank shower/change facility at work higher, but unfortunately it does not exist.
I don't currently bike-commute to work. I don't currently work.
I just enjoy the ride.
Free parking; parking under shelter and close to work
I do not commute.
Again, I sometimes commute to school but usually do not. I'll fill out both 18 & 19 though.
I have access to a shower/change facility (my gym) *near* work but I pay for that --- no facilities *at* work. Re: question 19 below, some days I have to carry things to work that my bike can't handle -- those days I drive.
do not currently commute
I work from home. 0 commute time
I WISH! I'm looking for a job that enables me to commute by bicycle. I'd love to sell my car.

**Question 22: Comments regarding motorists' behavior?**

<p>People in cars only care about themselves. They can't wait 10 seconds to pass someone and would rather put a cyclist at risk than give them the 2' of passing room that is required by law.</p>
<p>In general, I think motorists are very selfish of the roadways. Unless a driver is also runner or cyclist, he or she doesn't always exhibit patience or understanding for the person who is trying to utilize the roadway for commuting or fitness reasons.</p>
<p>They lack education and tolerance for cyclists.</p>
<p>some are extremely negative, some are extremely positive but most are neutral</p>
<p>Some need to pay attention to road cyclists.</p>
<p>-Motorists pass on blind hills -Motorists pass too closely (side view mirrors are very close) -Motorists honk their horn -Motorists don't yield to cyclists when cyclist signals to change lanes, e.g., merging left into a turn lane; some motorists won't yield to allow lane change</p>
<p>They aren't even courteous to other motorists, let alone bike riders</p>
<p>Bicycling is hazardous for both the bicyclist and the motorist because there are no bike lanes, not even an adequate shoulder.</p>
<p>Rarely do I encounter hostility. Most motorists seem to be supportive.</p>
<p>Some motorists are courteous but many are not. It's the ones that are not, that worry us.</p>
<p>I have been nearly run off the road; yelled at; flipped off... The worst was been being smacked on my hip, by what I believe was a textbook, by a group of teenagers while traveling through the tunnels at Schafer's Crossing. On that occasion I thought I was going to be severely injured. Nothing but laughter from the kids.</p>
<p>In too much of a hurry; will not slow down when oncoming traffic puts biker abreast with cars passing in opposite directions.</p>
<p>They have no respect for the right of bicyclists to share the road; and they are in too much of a hurry to wait for slower cyclists and therefore try to pass in locations that are not safe for them or put the cyclists at risk</p>
<p>for the most part tolerant but the exceptions make it dangerous</p>
<p>We're pretty much invisible and RARELY will anyone slow down for the obstruction (me) in their lane. They drive out in front of oncoming traffic leaving me to take the ditch so they can swerve back in.</p>
<p>Depends on time of day.</p>
<p>I grew up/raced/trained/commuted/worked as a bike messenger in the D.C. area, so Roanoke motorists &amp; traffic seem like no problem at all in comparison.</p>

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

I hear people at work say they can't stand a cyclist to be on a road because of the speed variance and difficulty passing. Although I love to ride a bicycle, when I am in a car I don't like to encounter a cyclist on the road and find it difficult to maneuver around them. I don't ride a bike on any major road.

I'm sure there are some bad attitudes; there are always a few in any circumstance. I know there are people who resent that they pay to drive their car (licenses, etc.)& bikes have the same rights.

I drive and I do not like to share the road with bikes. All users should pay road taxes. I used the road when I was young, but I always got out of the road when cars came. I was taught that autos had the right of way and I respected that. After all, common sense should be used. Do you know what a 3,000 pound auto would do to you?

The majority of motorists seem to be neutral toward cyclists, although it is not uncommon to encounter motorists who are overly aggressive or do not provide enough room when passing.

Motorists I know have trouble seeing cyclists. Most think cyclists are "in the way"

Motorists have a bad attitude towards other drivers none the less cyclists!

For the most part driver attitude is pretty favorable as long as cyclists do not "get in the way". On some rare occasions drivers have bad attitudes and sometimes voice those vocally as they pass.

Again, if there were more bike lanes this would probably improve as the cyclists would have their own "spot" and would not be slowing down the cars.

This question isn't easily answered--most folks are neutral, although there are some with a clearly negative bent. This issue is too complicated for a survey question and instead requires dialogue and specific research.

99% of drivers are very good but the other 1% are dangerous.

People blow the horn and try to pass as close as possible, intentionally making biking unpleasant. Motorists everywhere, not just in Roanoke, must be made to understand that bikers must be respected.

Motorist are becoming more tolerant, but still have very little patience or knowledge of laws regarding cyclist.

Generally have not had problems with motorists. Biggest issue is interactions at intersections were motorists (and I) are not sure of the best way for a bike to proceed through...

It's not a popular thing to do and people look down on you or make fun of you or consider you a nuisance when having to travel behind/next to you.

It has improved some over the past year, but many motorists seem too distracted to notice cyclists.

They mostly consider cyclists to be an annoyance, or to simply not exist. But I haven't had any real problems.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

too distracted, cell phone, texting, putting on makeup,
Typically impatient.
They act like non-motorized users have no right to use the streets. At best they are grudgingly tolerant. At worst they are belligerent, hostile, and sometimes dangerous. They clearly do not know or do not care what state law says about the rights of bicyclists to use the streets and roads.
Most are accommodating.
Unknown for Roanoke however; NJ is NOT good!
Motorist either don't know how to behave when they come upon a biker on the side of the road, making it unsafe for not only the biker, but on-coming traffic, or they don't care and pretty much run a biker off the side of the road. Seen it happen too many times, which keeps me from wanting to get out there and join those bikers.
I have ridden and raced thousands of miles in New England especially Massachusetts. Aggressive, angry, impatient and dangerous drivers were the norm. In my 6+ years in the Roanoke area, city and counties, drivers are polite, give room and wait. However, the cyclist must not antagonize or expect more lane than what they need- two abreast racing cyclists are frustrating even for me. I ride courteously and carefully and feel safe here.
Although I only commute to work a few times per year, I have never had a commute in which I did not experience honking, jeering, and/or unsafe passing, with the latter being the behavior that most discourages me from commuting on a regular basis.
In the past ten years motorists have become more accepting of bicyclist on major roads such as 419 but not so on 220 S near Hunting Hills Plaza where there are trucks and no shoulders for bicyclists to ride. Speed limit is high and trucks and vehicles speed past you causing a wind back draft which can be very difficult to ride through.
When I go on a ride 99 out of 100 cars are no issue, but there is almost always one that passes too closely or the driver is actually aggressive. It only takes one.
Have had one apparently try to enforce his "right" to the streets over mine.
Most problems seem to be caused by motorists not paying attention.
I think the attitude of drivers in the area has improved although there are still some drivers with negative attitudes towards bikers.
I've never had any issues but my husband has
I've been cursed off the road a few times, and was not actually on the road at the time! (well out of 3-4 ft from edge)
motorist don't pay attention to other vehicles, and least of all bikes and motorcycles
Grossly inattentive would be a best description.
Better if riding with a group

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Most motorists barely know the motor vehicle laws, much less the bicycle laws. Motorists yell for you to get on the sidewalk, pedestrians yell for you to get in the road. Nobody knows that bikes are considered vehicles. It's a depressing situation and I will luckily be relocating to Northern VA / DC area, which is completely connected by bike paths.

Once you get outside of the city, people do not seem to "share the road" as well as they do inside the city limits.

Maybe they are fearful of hitting me, so they act like jerks.

A small no. of people are negative.

Most motorists are OK, but some are just plain jerks.

There are always rotten apples that spoil the bunch, but those rotten apples will kill someone.

Most don't bother making accommodations for bicyclists and seem to consider them a nuisance.

Cyclists are in their way.

Arrogant; bicycles don't belong on the road; unlawful, threatening driving; dangerous; inattentive

Rare hostility

Most are very accommodating. You can always find a jerk.

Not totally negative, I feel like they think "we" are a nuisance.

Most motorists don't understand the laws governing cycling and/or disagree with our rights to use the same streets as they do.

I believe the majority of drivers wish cyclists would not ride their bikes on the roads. They truly believe the roads are for automobiles and trucks only.

Aggressive!

Most are ok but there is an occasional driver that is rude or dangerous.

**MOST DRIVERS ARE UNAWARE OF THEIR OBLIGATION TO OR HOW MUCH SPACE THEY NEED TO GIVE THE CYCLIST OR HOW MUCH SPACE THE CYCLIST HAS A RIGHT TO ON THE ROAD.**

I have had all 3 (Negative, Neutral, and Positive). It is generally neutral, but neutral doesn't mean safe, in fact it probably means they are not paying attention. Also, it only takes one negative to kill someone on a bike.

Better than a lot of other cities, but it also depends on which road your riding on. Busy roads they do not care as much they are rushing to get somewhere and if they clip or force a bike off the road no big deal it will not hurt there car as much

cyclist are in their way

Drivers are usually courteous, but often clueless or uncertain how to respond to cyclists. They are not always expecting cyclists or even paying attention carefully to the road. On major roads they don't slow down.

It slowly continues to get better.

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Most behave safely. There are a few jerks. It only takes one to kill you. We need to provide at least dedicated bike lanes on existing streets.

Most local drivers are clueless about bikes and the fact that they are supposed to share the road. The cell phone people are just downright frightening!!! They don't share the road well at all.

most are beginning to appreciate the fact that a bike on the road means more room for cars

Many people honk! I love that! I wish they all did. That way I know for certain that they are there behind me. A lot of people want to make sure that I have enough room.

Motorist on the whole are very accommodating; have had very few negative experiences with motorists

From what I have seen of motorists in the area they are ignorant as to driving safely with cyclists on the road.

Commercial vehicles (i.e., logging trucks, delivery trucks, etc) are the most dangerous operators. These vehicles rarely slow down or yield to oncoming traffic or bicycles when passing a bicyclist.

Mostly positive, I think they are very tolerant for the most part and surprisingly educated as how to behave with bicycles in the road.

I believe that I'm going to say 95% of motorists give you the room or "space" you need to navigate down the roadway while the others crowd you and just don't give you enough room, turn down a street in front of you....common aggravating things

Cyclists appear to cause road rage, this is a major deterrent to someone who is not an avid cyclist

Some motorists are rude at times, but that's brought on, in some cases, by cyclers who don't obey the rules of the road. Some motorists consider bikers a nuisance and a joke and will go out of their way to intimidate the biker, making a dangerous situation.

Speed and lack of driver attention concern me more than driver attitude of cyclists.

Motorists here seem friendly to bikes, allowing plenty of room and often yielding to bicyclists.

Depends on the route and street location

For the most part motorists are aware of cyclists and respond appropriately on the road. However, this seems to be due to the fact that cyclists on the road are such a novelty. Drivers are often nervous around, which seems to point to a need for more driver education.

When motorist see bicycles, they automatically think "slow". It is their natural instinct to pass the bike, even if there is a stop sign less than 50 feet ahead. They cut back into the lane, right in front of the bike and stop. It is hard to avoid running into their car.

Not all but the few make it very dangerous, i.e. get very close to you with car and make very negative comments.

I'm happier with them when they don't honk obnoxiously as driving by. Or don't hit me when I am cycling. Either is good.

The most negative I have ever encountered. They need education about sharing the road, how to pass bikes, manners.

Most seem neutral, but I am aware that as a female, I often get more accommodation than my male friends. I ALWAYS wave a thank you to motorists in hopes of building good will. To date I have never had a negative encounter with a motorist.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Don't see a bunch of road cyclist on the road, and aggressive driving.
Most people have their radios on, are on cell phones, windows rolled up, don't look in their blind sides & all around do not pay attention, look to see that bicycles are around - not making sure of their surroundings...the same issues with motorcycles (which I do ride)
Too many drivers have nearly hit or knocked me over at intersections, etc they don't look & are too busy cell phone/texting/eating/etc to notice anything but other cars or cops.
THIS IS A HARD ONE TO ANSWER. I'D ESTIMATE 50/50 I RIDE THE ROADS QUITE OFTEN. MY MAJOR CONCERN IS MOTORISTS THAT PASS ON A TWO LANE ROAD WITH ONCOMING TRAFFIC AND NOT ENOUGH BIKE FACILITY FOR THE CYCLIST MANY MOTORISTS ARE NOT AWARE THAT WE HAVE THE SAME RULES AS THEY DO AND DO NOT ABIDE OUR PRESENCE ON THE ROADS
I think that motorists are getting use to seeing cyclists on the roads, but for the safety of all it would be better if there were more bike lanes.
No negative occurrences in last few years
Many/most motorists are neutral/indifferent. But it only takes a few aggressive or carelessly indifferent motorists to make for a scary & dangerous biking experience.
This is a touch question but I think it trends to the negative side...there have been several instances when motorists challenged or threatened me on a bike but often you get the 'serious motor revving', telling you that the motorist is angry
The attitude is getting better since more people are riding...but bad cycling behavior by a few causes irritation by motor vehicle drivers. Example: running red lights; not stopping for stop signs, riding the wrong direction, riding on sidewalks
For the most part drivers in the Roanoke Valley have come a long way since the days of Bradshaw resident Jackie Wimmer who declared "open season" on Cyclists in a Roanoke Times letter to the editor in the late 80's.
Very dangerous with intense anger even when following the rules. I cycle at 15-18 mph. My wife was killed on a bike in 2003.
There are both negative and positive attitudes and behaviors. Some very respectful, others not. Teenagers can be awful. I wish there was a greater emphasis in Driver Ed. courses on how to share the road with cyclists.
There are always rednecks regardless of where one cycles. Some cyclists are their own worst enemy in not being thoughtful to motorists.
In my opinion motorists are uneducated about sharing the road. On EVERY ride I have at least one incident of someone honking, yelling, passing too fast or too close, revving their engine, etc. However, there are some considerate motorists but all it takes is ONE inconsiderate motorist to take a life!
Most are OK... Some are not and those are the dangerous ones.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I was run off the road by a motorist on the parkway last week. They are not paying attention. Parkway speed limit should be lowered to 35 in the Roanoke area.

Most are courteous, but there are definitely some bad apples out there...

Overall good, but unfriendly connecting from the Tinker Creek Trail to downtown. I've had several people shout and honk their horn on Norfolk Ave. in Roanoke.

It seems to me that most people -- myself included -- become complete jerks behind the wheel. I have no interest in sharing a car's path; I want my OWN strip of the roadway. I don't trust vehicles to be respectful of my space.

**Question 23: Comments regarding cyclists' behavior?**

Some good, some bad. But everyone lives in fear of cars because of the way the people around here drive.

As a new person to the sport of cycling, it's hard to rate the attitude/behavior of cyclists in the valley as a whole. I know that I am intimidated by using roadways for cycling, mainly because I don't trust the drivers to be aware of, and courteous to, cyclists on the road.

Many cyclists are very inconsiderate on greenway of other users. I use for cycling, socializing/walking dog and running and the cyclists are the rudest users.

Cyclists need to obey traffic laws, e.g., don't blow through stop signs Cyclists should wear helmets

I have seen too many "serious" bikers only slow down at busy intersections. They rode through red lights when traffic was light.

We cannot ride our bikes everywhere we'd like to safely!

As with most things some are very good and some are not!

Most are careful and considerate. Some do not respect traffic enough

It depends on the cyclist. Some are come across as "holier than thou" and do not share the road but expect the operator of a moving vehicle. to do so.

Some completely disregard road rules, others are very conscientious, most are somewhere in between. On average, I call it a neutral rating.

There are many local cyclists that I have observed over the years that the greenways have been open, that have shown that have no notion of practicing proper cycling manners. (such as passing pedestrians, right of way, speed in some sections)

Sometimes the really good ones think they are too good to wave or acknowledge a less experienced biker or one on a hybrid.

need to keep single file more often

Wish road bicyclists (usually the serious ones) would call out more when approaching pedestrians. The underestimate how much people can hear. They are very fast and very silent.

Most cyclists are responsible and friendly toward other cyclists and pedestrians, and as accommodating as possible toward motorized traffic. A few are overly defensive and/or break traffic laws but you'll see that anywhere.

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Most I have spoken to are hostile about the lack of accommodations in the Valley but most seem to not support projects that improve the accommodations, they want a separate wide area to ride in. Most are negative towards drivers as well.

I have witnessed some bad behavior from cyclists at times. I travel the Parkway a lot & sometimes they ride side by side & take the whole lane. It's risky to them & vehicles.

Road hogs, very rude. Followed some riders for several miles on a back road. They were in the whole road when a car was not coming. Had to set on my horn before they would let me by.

I see a lot of cyclists ignoring traffic laws, running stop signs passing stopped cars, etc.

I see a lot that do NOT obey traffic laws, like traffic lights etc.

As a commuter on a bicycle my main objective is to get from the Smart Way Bus stop to work safely and in a timely manner. My policy has been to always yield to vehicles and stay out of their way as much as possible even if it is an inconvenience to me.

Again, this question isn't easily answered.

Like motorists, most are good but a few bad apples that hurt all of us.

Too many cyclists are also in the wrong and don't follow rules of bike safety when riding.

I only say that because I've seen more "inexperienced" bicyclist ride diagonally through big intersections in front of cars, etc. that reflects negatively on other cyclists

Great mountain bike community!!!

Some don't obey traffic rules--need to consider ourselves as vehicles.

I see many that do not obey traffic laws.

I see bicyclists breaking the law (e.g., running stop lights, failing to signal). These should be corrected but they pale in comparison to motorist bad behavior. The bicyclist behavior that seems to anger motorists most - taking one's place on the street and refusing to be intimidated - is not bad behavior.

Most are accommodating.

Unknown for Roanoke however; NJ cyclists would be frustrated!

Some 'bikers' don't need to be out on the roadways. They have no knowledge of biker rules or lack the hyper-sensitivity to have fore-thought on what a motorist might do. That is why off-road/greenway paths would be much much better!

That question needs finer categories. Most regular folks on bikes here have a positive attitude. Numerous of the racer types though are arrogant and take too much lane or ride expecting too much from the motorist.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

There's a small percentage of cyclists who blatantly disregard laws and are less than courteous to other road users; however, I think the majority of cyclists are conscientious road users who follow the rules to the extent that those rules provide for a cyclists safety (which isn't always the case).

Experienced riders generally ride legally and responsibly. Large group rides are a problem for drivers because of long pace lines and side-by-side riding. Inexperienced older riders and young people often ride unsafely on sidewalks, the wrong way on streets, without helmets, disobey traffic signals, etc.

Cyclist in the Roanoke Valley is appearing on roads and greenways in larger numbers. Those that have had the proper training in the rules of the road and greenways are very polite and accommodating. There needs to be bicycle educations for riders just like there is for cars. People can't drive a car without training and so it should be for riding a bicycle. There should be bicycle education classes just like there are driver's ed. classes. This would help people to be better prepared when riding their bicycle on the road with cars.

Most cyclists I know behave appropriately and in accordance with the law. They may not come to a complete stop at a stop sign -- but don't dart into traffic either. Any misbehavior I have ever witnessed was in response to driver aggression or ignorance.

Bike laws are not taught from the actions of cyclists. Wrong side of road, stopping, etc.

I think most cyclists are pretty good, but there are still too many who either don't know or don't follow common "rules of the road".

I've been embarrassed on group rides b/c of the other riders riding double wide or running stop lights/signs and therefore do not participate in large group rides anymore

Most are friendly, hey, they are environmentalists, right? Not bicycling for no reason!

Appropriately Paranoid

I have observed road bikers blatantly blowing through stop signs, stop lights, and not wearing helmets. Bicyclist groups stage events where they call attention to themselves, but do not wear or promote helmets or bike safety.

It would help if more cyclists would follow the rules of the road. I saw someone riding on the wrong side of the road up a blind curve/hill just two days ago. A recipe for disaster.

Although there have been some recent deaths of cyclists, people still seem to keep their chins up!

Ride against traffic, on sidewalks, blow thru stop signs and red lights. Some cyclists act like jerks on the Roanoke river greenway.

I think most obey traffic rules.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Cyclists need to remember they are a vehicle, obey the traffic laws and be respectful of cars. I have seen cyclists give those of us considerate riders a bad reputation.

Some cyclists think they own the roads.

Most are lawful and considerate; some are unlawful and arrogant

We want cycle friendly streets so we can ride to work. I would like to see pedestrians on the greenways be more aware of cyclists and not walk 3 or more wide and not be aware that bicycles are coming up behind them. I find pedestrians and runners indifferent to cyclists.

Some cyclists blatantly disregard traffic signals and stops. Some are pretty nasty to motorists. It's a situation that perpetuates itself mostly because of the attitudes on both sides. In reality, I don't think we're that far apart.

I believe cyclists abuse their ability on the roads. They run stop signs and traffic lights and block traffic. Cyclists need to be better educated on riding etiquette.

Some cyclists disobey rules of the road; most adhere to caution.

I am very encouraged by the increased number of cyclists on the greenway and impressed with the small increase in bike commuters.

For the most part good, as a cyclist you sometimes get upset when autos do not share the road

cyclist have become used to horn honks and unsafe driving practices

They as well don't always know how to interact with traffic... the rules of the road

Perfect is the enemy of good. A 1.5 ft shoulder would work, but we get nothing because we can't afford the desired full-width bike lane.

For the most part cyclists are easy to get along with. I've seen a fair share of bad apples though!

Inconsiderate bikers riding abreast instead of single file on side of road, holding up motorized traffic and creating a public relations problem.

Share-a-Bike is awesome.

Many cyclists, especially the spandex/lycra lot, consistently do things that piss drivers off, such as riding two or three abreast, taking more of the travel lane than necessary, running stop signs and traffic signals. Cyclist must give respect in order to receive it. General elitist attitude of many primarily recreational cyclists.

I believe that, in my opinion, all of the cyclists in the greater Roanoke Valley are well mannered, all of them I've seen wave at me and I've seen

them wave at each other like what I have been saying is a big family of people.

Some cyclist are very courteous but some are very arrogant and believe the road belongs to them. When cars approach from behind, I move to the right side of the road to give cars enough room to pass. A lot of cyclers don't, and force the driver into the other lane to pass. I think City Police should conduct classes on Bike safety and rules of the road. And exercise warnings to those bikers and drivers who break the traffic laws and then ticket those individuals who continue to violate and if that continues, take their biking or driving privileges away.

From numerous observations, sport cyclists in the valley (the ones on racing bikes) are usually rude and demonstrate more risky behavior. I've seen them glance-and-roll through red lights at intersections a lot.

Probably negative towards the few who make very dangerous to ride road routes.

In general they seem to try to do things to encourage biking around the community and share their knowledge with non-bikers who exhibit healthy curiosity about bicycling.

Cyclists have a very poor attitude. Mr. River Laker and his offensive Manif Spaciale event are excellent examples of the attitude of bicyclists in the Valley.

All in my circle act as ambassadors for the sport, encouraging non cyclists to try the sport.

too many cyclists that a) do not obey traffic laws, and b) many are too aggressive

They have a destination & are more aware of what is around them.

Generally positive. Some bikers ignore traffic lights & signs, not a good thing...

ANOTHER HARD ON. CYCLISTS NEED TO UNDERSTAND THAT THEY HAVE THE SAME REGULATIONS/RULES AS THE VEH. THERE ARE EDUCATED CYCLISTS THAT DO NOT RIDE IN SINGLE FILE, THEN THERE ARE UNEDUCATED CYCLISTS THAT RIDE IN THE WRONG DIRECTION WITH NO SAFETY EQUIPMENT.

I see the cyclists as somewhat aggressive; this may be due to the defensive nature they must possess in order to stay alive on the streets. I totally agree with SHARE THE ROAD, but that should go both ways.

Some rides will not ride single file in traffic. Overall, though, very good

Some cyclists on the greenways do not pay attention to others and block the greenway making it difficult to pass etc.

Most cyclists seem to share the roads appropriately (considering their size and speed disadvantage), but there are many who give bikers a bad name by slowing traffic when they shouldn't. Riding side-by-side on a main road is just plain dangerous. And while I applaud people who bike to work, they must realize that the majority of road users just want to get to work on time without having to swerve around a bicyclist at rush-hour.

Do not always follow laws of the road (stop signs, yielding right of way)

See above. More people need to take cycling education. Many of the experienced riders are the worst for poor cycling behavior. These cyclists will never take a course...but they might take a survey with a yes/no test and then the answer with an explained reason for the answer. Well, they probably will not do that either. Best to learn by the positive example of other cyclists.

Again there is a mixture. Because we (cyclists) are in the more vulnerable position on the road we tend to be more respectful and law-abiding by en large.

There are always some rednecks - even on bikes.

Negative and positive. I know some cyclists who do not obey traffic laws as they should and then grumble about inconsiderate motorists. Then there are others such as myself who stop at stop signs, red lights, etc even if it means dropping back from the group!

We try to obey all traffic laws including stop signs.

Though not to the level of motorist, but there are also some cyclist bad apples...

I think there are some cyclists in this town that might be fostering a bike vs. car feud. I hope this isn't the case.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

**Question 24: When bicycling for TRANSPORTATION purposes (commuting to work/school, running errands, shopping), list the five streets, greenways or trails you most often use? Include specific street segments and/or intersections for reference.**

colonial	220 Alt in Botetourt	Main Street--entire length		
Elm Avenue	Colonial Ave, entire length.			

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Complete Roanoke River Greenway	elm Ave	Shenandoah Ave. - Roanoke to Salem		
Jefferson Ave	Jefferson: signs, sharrrows, bike lane w/ right turn design	Riverside Dr. Salem		
All of downtown	Franklin Road	Williamson		
581 - needs connection to surface streets on side opposite of Mall	Hollins Rd from Plantation Rd to Orange Ave(narrow)	Franklin Rd/419		
Williamson Road b/t Downtown & Peters Creek	Yellow Mountain	Wise Avenue/Campbell from e city line to downtown		
Colonial between Brandon and Broadway	Link from Downtown to Roanoke River	Rt 220		
Hwy 11	311 to Catawba	419 (all of it)		
Downtown area	Franklin Rd	419-make shoulder a bike lane		
Peters Creek Road	Grandin Road	Rt. 24 from Stewartsville to Vinton		
Riverland Salem	peters creek road	Franklin		
Jefferson Street	Campbell Ave sw all the way downtown	Franklin		
mud lick road beginning to end	Grandin, Brandon Ave west to Cave Spring	PHHS to VWCC and VWCC to Crystal Spring		
Brambleton Ave 221	Avenham from KMart/Franklin to McClannahan	re-pave 6th street between Campbell and Elm		
Tinker Creek GW needs to be connected to Hollins	There are no bike corridors in the Hollins area	Rutrough Road		

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Grandin/Garst Mill from Beverly Blvd to Cave Spring Corners	parkway	Melrose from West City Limits to 10th St		
Williamson Road (bike lane)	elm avenue (ALL)	Extend Greenway to Smith Mountain Lake		
Expand Greenways	Franklin (near Kmart)			
10th street, SW	Downtown Rke --- from Elmwood Park to Hotel Rke			
Roanoke River Greenway West Salem to Explore Park	Brandon Ave, from Grandin to Franklin			
Grandin rd	Cloverdale road - I-81 intersection			
Electric Road	Red Lane in Salem			
460 from Roanoke Civic Center to Blue Ridge Pkwy	Franklin Rd.			
greenway at Roanoke memorial garage	Grandin from Memorial to Grandin Rd Ext & 419			
green way from Wiley drive to Salem	Colonial Ave from VA Western to Brambleton			
Brambleton Avenue	Carvins Cove to downtown			
cove rd/Hershberger	Gus Nicks			
Jefferson Street	Franklin Road/419/Electric			
Plantation Road (From Orange Avenue going	Brandon rd			

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

North)				
Orange Ave	PLANTATION RD			
Rte 221 between Bent Mt and Rte 419!!!	Colonial Ave from VWCC to Route 419			
460 i.e. challenger, Melrose, main st	Rt. 460 west of Salem			
Downtown Roanoke: signs, and bike racks	Wonju			
Rt. 419	Upgrade greenway to make it contiguous from all the way to Salem			
Brandon Rd from Grandin Rd to Mudlick Rd(narrow)	Brambleton from Brandon to city limits			
Jefferson St	DOWNTOWN TO THE STAR (AND THE PARKWAY)			
Link from Grandin Village area to downtown	Lee Highway//Brandon			
Eastern City to Bonsack - King, Belle/Carson	Colonial Ave			
King Street from Belle/Carson to Gus Nicks	Paved link between Rutrough Rd. and Explore Park entrance at BRP.			
Williamson Rd	Elm Ave			
Brambleton Avenue	Williamson Rd			
route 311 add more shoulder	Shenandoah Avenue - Williamson to 24th			

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

	Street to 419			
Grandin road	Rt 460			
Brandon Ave - all of it	Buck Mountain Road (Starkey to 220)			
Franklin Road downtown to Brandon/Ukrops area. Maybe all the way to Tanglewood if possible.	Catawba RD			
Hollins Road in Hollins area	finish other greenways			
460	Rt. 460/Main St. Salem/Melrose/Orange Ave./Challenger			
Franklin road (ALL)	Colonial Avenue			
Williamson!!!!	Franklin			
Carilion intersection w/ Jefferson & Greenways	Brambleton			
	Electric			
Jefferson Ave.	311 from Hanging Rock to Bradshaw Rd			
cougar/Sanderson/Hollins/ old mountain - to downtown	rail road tracks on Campbell Ave			
	Colonial Avenue			
Salem City (need greenway routes)	Deyerle Rd/Mudlick Rd/Grandin Rd Ext			
Brandon Ave.	Build a safe/ bike friendly connector from the Tinker Creek			

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

	Trail to downtown Roanoke			
None of the streets in #24 are really safe for cyclists	Link Grandin Road to Rivers Edge (underway)			
Hamilton Terrace GW - Make it one way by Hosp. Garage!	Ditto Franklin Road.			
same as above				
Jefferson from Carilion to Campbell				
Shenandoah from downtown to Salem				
Hardy Road towards Smith Mountain Lake				
Brambleton Ave				
Grandin rd				
VALLEY VIEW MALL				
Franklin Road & Elm Avenue				
Brambleton Ave from Brandon to Hidden Valley HS				
BR Parkway (I wish)				
Better mapping for all greenways				
Brandon Road from towers area to Salem				
Elm Avenue				
Grandin from city limits to				

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Grandin Village				
DOWNTOWN TO AIRPORT				
Electric Rd - Roanoke to Salem				
Campbell Ave				
Franklin Rd between downtown and Tanglewood area.				
Grandin				
Orange Ave/460				
220 south				
any and all links between greenways				
blue ridge parkway				
Elm Avenue - Jefferson to Main Street, add bike lanes				
same as above				
Rt 311				
221, specifically the curves near Cotton Hill Road. Many of us don't mind Brambleton but getting through the curvy section is a major deterrent.				
Bradshaw Rd				
3214 Allendale Street				
finish Roanoke River Greenway				

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Rt. Rt. 311 from 419 to Newport Rd. (can I list this 5 times?!)				
Brandon Avenue! At least slope the sidewalk curbs at street corners!				
Vinton				
colonial				
Colonial				
220 S from Crowell Gap to Yellow Mountain				
419 and Ave				
Brambleton Avenue				
Rt 419				
The bridge connecting by Carilion				
Crossing at Franklin and Brandon				
Colonial Avenue is horrible.				
Cyclists do not belong on any corridors where they are not currently accommodated.				

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

**Question 27: List the top five activity centers or destinations you feel should be better connected via the bicycling network? Include specific street segments and/or intersections for reference.**

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>

**Question 28: How often do you use the following Roanoke Valley Greenways for cycling? Comments**

It is imperative to get the greenways interconnected as soon as possible.

Many greenway segments too short to ride.

mapping of these greenways and marketing them would be helpful for cyclists

Enjoy the greenways tremendously. Take my kids there to ride and teach them the rules of the greenway.

I would ride these trails more frequently, but too difficult to get to from my office.

None connect well with my neighborhood

Tinker Creek Greenway seems unsafe and dirty to me.

Love the Greenway along the Roanoke River - glad to see the completion near the Roanoke Memorial Hospital. The Greenway is wonderful and needs to be continued.

longer, uninterrupted segments will promote more use as will better connection to destination points

I don't own a bike

I used to walk them all when I could walk, but they're too short to ride. Not worth carrying bike to them.

My wife and I ride our tandem on the weekends for fun and exercise and try to do each greenway trail at least twice a year.

Great effort so far to spread the greenway system throughout the valley. I suggest an effort be focused on providing the core population of the valley access by completing the Roanoke River line between Salem and Roanoke, and completing major arterial lines serving the Roanoke River Greenway such as the Mason Creek Greenway and something along the Grandin/Rt. 221 corridor. This will afford major local populations better access to the greenway.

I don't currently ride a bike

Hanging Rock Trail could be easily extended over Mason Creek if there was a bridge; suggest asking local Boy Scouts and area communities to sponsor a bridge to be built.

I live in Christiansburg and none of these trails takes me to the location of my work.

Will use greenway more when the segment is completed near my house (below Black Dog Salvage)

I don't know where most these places are and have never heard of them. It would be nice to get mailings about the different places for bicyclists to encourage more biking.

I just haven't gotten to some of them yet.

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

I would use them more if they were all connected. 5 miles is not long enough to make it worthwhile for exercise - 20+ is.

I can't wait until all of these greenways are inter-connected. It would make it more worthwhile to get out for a long day of recreation activity, instead of an hour or so actually biking from one end to the other.

Keep expanding the Roanoke River greenway in Roanoke- nice job on that so far!!

I would use them a lot more, but I live in Botetourt.

Remember serious cyclists use greenways differently than families with kids and roller blade folks. Greenways are a fine solution if there is ample room etc. If I am out for a 30-50 mile ride at 16 mph, I am not typically interested in tooling along the greenway behind walkers and people on a beach cruiser type bike. I would rather be on the road in a lane that is safe from vehicles.

I don't know the names of the greenways

Greenways are great for riding with the family-- Wonder about security of Greenways in some sections

Greenways need to be connected ASAP, dead ends are not only frustrating, but inexplicable where they dump you out in traffic to get to the next greenway, and this causes confusion with greenway users, pedestrians, and motorists.

I would use them more often if more were connected!

Need to keep Greenways free of gravel and debris from Storm water run-off

Connecting the Roanoke River Greenway to Tinker Creek without having to go thru SE would be nice.... on continuous run beside the river. Perhaps Hotel Roanoke (Lick Run) could be better connected to the Roanoke River Greenway. The Roanoke River water is dirty. It could be a MAJOR attraction for all, if it were clean.

I do plan to ride on the greenways more often.

Shorter greenways are great for families with children and runners but most recreational cyclists want to ride an uninterrupted (no stopping, no dodging pedestrians required) 20 miles minimum. However, the fact that there are no cars to run over you is very nice.

Need Better Maps on Internet

I have never heard of many of the Greenways listed on the survey.

I don't live in the Roanoke Valley, but use the streets when riding in the area.

I don't feel safe on the Tinker Creek greenway. It is too isolated and a lot of vagrants walk that area. It is too short of a greenway. But mostly I don't use it very often because I don't feel safe as female riding alone on it. I do not know where the other green ways are located. I like to ride from my home to the greenways and would love to see them linked so I can ride more than 4 miles one way.

I would love to see the greenways connect and have one from Botetourt to the others. If people did not have to worry about traffic as much I think more people would ride. The silver comet trail in Atlanta is a great trail with traffic lights at intersections for the cyclist to cross

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Hanging Rock is too short and doesn't connect to anything. RR, Tinker & Wolf creeks can be sort of connected to make ride which we get to by Lick Run and home by scary roads when we should be riding the rest of Tinker Creek GW

Would use all these more often if they were connected to each other.

I had the chance to GPS these greenways for Roanoke Outside. They are all marvelous in a different way. If more people could see them as a family destination, they would use them more often. We host nature club for families events at the greenways because they are safe, wonderful places to play.

Great work at Wiley drive. the Murray run greenway is really nice

I think that a great effort has been made to connect several of the greenways and I am grateful for this.

I haven't heard of a lot of these, not sure where they are.

the greenways should be patrol by the Roanoke PD regularly, cyclist have been confronted by "thugs" in several different areas of the greenways, it is only a matter of time before some opportunist steals a bicycle or assaults a woman

wolf creek needs to be paved and connected to the parkway

I just moved here and haven't tried many of the greenways yet.

I would love to have a safe way to get to Carvins Cove from S. Roanoke

I am mostly trying to use the bike for commuting, not sure that these get me where I am trying to go but I will look into it.

Hamilton Terrace GW would be much improved if traffic was limited to one way to access the Carilion garage on HT, much like the way it is now that construction is under way. It is a high traffic area with pedestrian, cyclists, and motorists heading in both directions and crossing Belleview at the crosswalk.

I currently do not ride a bike, due to the behavior of the drivers not paying attention and running up on the cyclist.

I ride daily (assuming good weather, winter & summer). Always using the Rke River Greenway as a connector/take off point. We need maps on the greenway for out of towners. If you don't know the area you wouldn't know where you're going or where you'll end up. Although I am grateful for the system, it is not very tourist friendly.

Murray Run is part of my daily commute.

I love the greenway idea/projects. Please keep the going!

Currently I drive to Roanoke River Greenway so that I can ride my bike - Would like to be able to ride from my house off Brambleton to the greenway but don't feel safe on Brambleton/Brandon/Main streets as the traffic is heavy and there are no bike lanes.

Could not read the Greenway map to know where these greenways started or ended. Did not know about these other Greenways.

Ban Horses on trails. Allow Mountain Bike Access to Blue Ridge Parkway trails and Star Trail!!!!!!!!!!!!!!

Connect Greenways to Greenways Connect Greenways to Neighborhoods via Neighborhood Connectors

I use main roads, most of my rides are 40-100 miles each ride

Personally, I ride the road. I am traffic. I leave use the greenways to avoid bad intersections at rush hour, but I'm wary of the other recreational users. I have to slow way down. The best solution in my book is good manners and good pavement. Enforcement of laws on all vehicles, motorized or otherwise.

The greenways will become far more useful as more of the sections are connected. As they exist now, short unconnected segments are not useful for transportation purposes.

I Greenways have come a long way in recent years! Thanks. Moving forward: I honestly don't know why the old RR spur from Franklin upstream on the Roanoke River is not converted to a bike path??? There has got to be enough political will to get this done. Building expense bridges across the river is not the best solution from my point of view. Take out the low water bridges along the old Wiley Drive. Access the Smith Park (? near Rivers Edge) via Franklin Road. Run the Greenway where the old RR line is. I haven't seen a train on that track in many moons.

I want to try EVERY greenway! I grew up in Reston, VA, and am a product of their extensive and well-connected trails. I can't wait until all of Roanoke is interlinked in the same way.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

<b>Question 29: As a cyclist, what are the top three things or messages you would like motorists to know?</b>		
<b>1</b>	<b>2</b>	<b>3</b>
People on bikes have families just like people in cars do, and there are people at home that love them just as much.	The law says motorists must give cyclist 2' of passing room.	Cyclists pay the same taxes and have the same legal rights to the road as motorists.
Please be considerate of cyclists	Don't talk on phone or text while driving	I know your there. I'm not stupid
Just go by me. Don't slow down	DON'T HONK. I can hear you	do not run them off road
share the road	treat cyclist as you would another vehicle	be respectful
share the road	look and be prepared	Take your time
Would rather not share the road, but have bike lanes eliminating conflict	You don't have to accelerate when passing	Don't assume that a cyclist is trying to make driving harder for you.
Pay attention	It's better to give a cyclist on the road too much room than not enough.	Don't honk your horn: scares the hell out of a cyclist
I ride my bike as if it were a car--using signals, stopping at lights, etc.	When passing, give at least 3 feet: it's okay to cross the yellow line to pass safely	I have a great lawyer
Don't pass on blind hill: wait a few seconds	Just because we can't go as fast as a car, we still have a right to the right of way	Give us room
Always be aware that I am there	Share the road	Please don't tailgate us.
Hang up and drive	Cyclists are saving resources motorists use	Hang up the cell phone
They have to leave their car sometime . . .	Even if you tap us lightly we will crash!	A bike isn't there to tick you off; it's a means of transportation as well as recreation.
They should switch to biking if they can!	Be attentive at all times	Try putting yourself in my place for a moment, hmmm.
How to safely pass a bicyclist	Bicyclists are supposed to follow the rules of the road.	cycling makes roadways less congested

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

We can't stop on a dime!	Scaring the _ _ _ _ out of me does not help.	Do not text while driving!
Be observant	look out for cyclists not just other motorists	Bicyclists don't stand a chance if they tangle with a car.
Cyclists are human and have rights.	The penalty by law they could face if they strike a cyclist.	don't honk before passing
Go around me widely.	Don't crowd a cyclist when meeting traffic. The bicyclist has the same right as you do to be on the road.	When passing cyclists do not pass too closely
Keep your distance when passing us.	pass with plenty of clearance when no oncoming traffic is coming	I will obey the traffic laws
Share the road	Don't pass cyclists when there is no room to do so	Sometimes you just can't go first!
Bicycles are legally required to ride on the road, not the sidewalk.	I will move over when possible	Please be aware. we are everywhere
Give me some room to work with, PLEASE!!!	It is dangerous for a rider to hug the edge. Give me room, especially uphill!	Cyclists have to supply their own power
cyclists deserve same respect as motorists	Please be aware. we are everywhere	as a slower vehicle I will stay to the right
Cyclists have a right to use the roadway.	Cyclists have to pay road taxes too	Move over when approaching from rear and/or wait until traffic passes to pass cyclist
Be aware of cyclist and pay attention to the road.	cyclist have rights on the road	Obey the law
slow down	Not every bicyclist is a Lance Armstrong.	Cyclists can be going faster than you think
Share the road and respect cyclists rights to use the road too	When passing cyclists, need to allow for more than a few inches	existing rules of the road
I'm going as fast as I can	obey traffic laws	Slow down and get over
If it's in your lane, YOU should yield	Slow down when approaching from rear	we wish you were having as good a time as we are

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Please be aware. we are everywhere	Share the road	Know to watch for cyclists - cyclists have right of way if cars have right of way in the same spot...
Bikes are vehicles with rights	Look for cyclists before making any turn	Use your turn signals!
slow down and pass when visibility is best	awareness of alternative modes of transport	I don't go as fast as a car - it's ok to turn into traffic if I'm still half a block away.
Be considerate of bicyclists, not all of them ride for fun, some ride to live.	We are vehicles not toys	know how to pass a cyclist
I'm here, slow down & pass me carefully.	You do not have the right to blow the horn at a cyclist	Yes I know that is a red light and I should stop
Cyclists have a right to be in travel lane	you are wasting gas by flooring it when you pass us	Don't even think about texting!
have a right to the road	How to relate to bicycles at multi-lane intersections/turn lanes (I'd like to know this too)	You don't need to swerve into oncoming traffic to avoid hitting me. Three feet of clearance is reasonable.
We have as much legal right to the road as motorists	I am stopping at this light too so no need to try and pass me.	We're doing good for the environment
Be courteous	Share the Road	to not honk at from behind
Pass cyclists with plenty of room	It is unnerving when you ride by me while texting.	Relax and remember not to feel time pressure behind the wheel.
awareness of presence	pay attention	get off your butt and ride too
We belong on the road	I know that you are there and will not pull in front of you	follow road rules
Bikes belong on the road	Stop messing with your iPod	Sidewalks are not for bikes
We own cars and pay taxes too. the bike does not wear out the roads like the cars do	Please stop thinking it's hilarious to blast your horn as you ride next to me.	Do not make right turns in front of a passed bicycle.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Need to treat bicycles in the same manner as another car	Please be careful around us	Might doesn't make right. Being in a car doesn't give you the right to bully and harass people who are not in cars.
I am here!	to not pass on blind corners	Don't Honk
Pay attention	Be aware that cyclists can swerve to avoid a pothole.	If you hit me, I will sue you.
Bikes can go from 0-10 mph quickly, so letting one turn in front of you won't spoil your day.	Don't hit and run	Please do not text while driving
share the roads	don't get too close	CHECK FOR CYCLIST WHEN TURNING RIGHT INTO PATH
You weigh more than us and it hurts when you hit us	Do not pass me and then turn right in front of me	Do not harass cyclist.
Please pull over to use your cell phone	Give cyclists more space when passing.	Cyclists aren't out to slow down your day by staying fit, lazy people! :)
Please stop trying to "teach me a lesson" by coming dangerously close to me while I'm riding. This is mostly from elderly women.	You don't own the road. Gas taxes don't begin to pay the costs of road construction and maintenance.	hang up and watch out for me
We are trying to accommodate you	Share the Road	I'm saving gas for your SUV
to treat cyclists as vehicles	I have as much right to be on the road as you do.	With proper road improvements, cars and bicycles can coexist.
Be aware of cyclists when making a right turn.	Don't cut us off	Pretend that I'm your father or brother when you see me
Share the Road	Please allow room for bicycles	Pay attention when you drive-stay off the phone
Be respectful	CYCLIST CAN NOT ALWAYS RIDE SAFELY ON BERM OF ROAD	the vehicle can be a weapon
pay attention	Give adequate space when passing.	Quit racing me to the intersection or turns

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

We pay taxes also	Be more aware of cyclists - blind spots are dangerous	
Bicycles have a right to be on the road.	it hurts to get hit by a car	give bikes right of way
Bicyclists belong on the road. Bicycles are vehicles and have a legal right to be on the streets like any other vehicle.	Bikes need 3' room for safety	patience
Give wide space when passing	Provide plenty of space when passing	Cyclists reduce the carbon footprint on communities by saving fossil fuels.
Hang up your cell phone and pay attention!	Your car can easily kill me	Cyclists that are forced into the dirt beside the shoulder can easily be injured or die.
Give us room when passing us.	Please do not crowd me	Most of us already own cars. Don't suggest we get one.
Please do not litter	be attentive	Bike a mile on Williamson Rd, then you'll know
<b>ALLOW ROOM FOR PASSING BICYCLE</b>	Pass as there is an opening	Put your phone down
Cyclists are permitted on the road.	give bikes space	If you've just passed a bicycle, be aware when making a right hand turn.
Share the road - don't push bikers off the side/don't linger behind them.	3 foot passing zone	Follow for a bit, then pass, so we know where you are.
bikers are out there	Cyclists save green space because they don't need paved parking lots to park their bikes.	Anticipate potential incoming traffic if trying to go around cyclist on a 2 lane road
Bikes can turn left from left turn lanes.	Cyclists should be regarded as a slow moving vehicle, wait till its safe, and then pass.	I already own a car
It won't hurt to slow up	We don't know you're behind us. It's hard to hear with the ambient wind noise.	If you don't like me being on the road, vote to fund more bike paths!
I'm going faster than you think I am	follow the laws just as if I were a car	And I am not a liberal hippy!
Cyclists are allowed on the road	Be alert	Don't drink and drive.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

share the road	Bicycles are vehicles just like cars with the same rights/responsibilities.	USE CARE WHEN PASSING A CYCLIST
Pay attention at stop signs	Cycling is more fun.	Drive and don't be distracted!!!
watch for bikers	Keep your distance--passing close to a cyclist is very different from passing a car close	For the most part we have to follow the same rules of the road as you.
Share the road	I don't want to be verbally assaulted	Patience
Cyclists reduce road repairs saving taxpayer dollars.	We're all safer if we pay close attention.	Obey the law!
Cyclists have a right to ride in the same lane as the cars	Don't hover over me.	Be alert and expect bicycles to be on the road. SLOW DOWN!
Don't honk right behind or next to cyclists. It scares us.	keep a safe distance	You don't have to be first to a stoplight. To sit and wait.
I'm here	Bicyclists are told to ride with the traffic these days.	I don't purposely ride on the streets to slow you down
share the road	LOOK BEFORE YOU OPEN YOUR DOOR DOWNTOWN	Stopping at an empty stop sign or signal is frustrating
We have the right to be on the road too.	Slow down	Be patient.
Don't buzz bicyclists. Leave 5 feet of clearance.	Bicycles can travel very fast so a motorist may not have enough time to pull out into an intersection before the bike gets there.	be patient
We want to work with motorists, and if there were more room on the edge of the road, we'd move over.	Slow down around us	do not honk your horn
It is very easy to kill a cyclist in a moment of carelessness.	Importance of giving plenty of room	That it will not hurt to put your brakes on, don't swerve around a cyclist into oncoming traffic just to keep from braking
We are tax payers and would like a little respect	My life is in your hands.	Learn bicycle signals

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I belong here	Drive lawfully, don't pass without a long sight line and give us a wide berth when passing	I am entitled to some of the road
I try to be a good bike citizen; please respect my choice.	Be patient.	Please give me space and be aware of your mirrors
Don't beep right next to me--by that time I already know you're there!	we know you the motorist is on the road so please watch out for us	Do not pass us when view ahead is restricted
I have right to roadway	We cycle in a group because it's fun and safer.	we care
Please don't buzz me, by being too close as you pass.	Be courteous.	It's my road too.
CYCLISTS PAY TAXES FOR ROAD USE	cyclists don't have airbags	slow down
Share the road	Be careful passing on two lane road	If the lane is not wide enough for both, I will take it all
Please give us room on the road	That cyclist pay the same taxes as you	DON'T HONK YOUR DAMN HORN WHEN APPROACHING ME!
share the road	don't honk	cyclists are people too, and are also motorists
Always stay alert on back roads because this is where we like to ride.	Slow down	obey the speed limit
Give plenty of space - don't forget about your mirror	I'm trying to behave predictably as a vehicle	I love my family!
Right of way at stop and yields	This is what my turn signals look like	Share the Road - its the law
I am human.	Wait for oncoming traffic on two lane roads to pass before passing us.	we have a right to be on the road
We are vehicles and have the right to be on the road	we have families too	acknowledge cyclists right to use the road
We have EQUAL rights on the roadways	I'm not doing this to annoy you	road does not belong only to the cars
Cyclists have the same rights motorist do.	Don't pass me with only 1 foot between me and your car.	Treat me the way you would like to be treated

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

WE try to ride as close to the right side of the road as we can	visibility issues	actively pass bikes, do not try to pass while staying in your lane
Don't honk your horn as you pass. It scares the bejeebers out of us.	look out	I'm safe
We can be easily killed by automobiles.	You have no right to endanger my life.	give us some right-of-ways as you would a pedestrian
be alert	Do not squeeze between cycle and oncoming car on narrow streets	Don't ignore traffic rules
Learn bicycle traffic signals	I speed across the intersections as quickly as you.	the bike lane is full of broken glass and debris
On that bicycle is a living, breathing human	give cyclists room on the road and don't cut corners	Happy motoring and cycling
we go faster than you think	be aware of sharing the road	bikes have an equal right to the road as cars
Don't honk!!! I can hear you coming!!!	most bikers have cars too and pay road taxes	I have a right to the road
Yield	Please be aware.	Slow down
WE HAVE A RIGHT TO BE ON THE ROAD	Lets agree to both obey the traffic laws	be patient
I'm a vehicle	don't hold traffic up, pass me	how fun it is to ride a bike
I am here, please be aware of that	patience	Slow down
Slow down and pass with care!!!!	If possible. move over to left a bit	Share the road
Share the road	drive the speed limit	Don't honk at me when I'm doing what's right
give space to bikers	Slow down for bikes.	Use your signals
I don't want to die	We pay taxes for roads also	Cycling is great exercise
There's only so far over in the road I can move.	no where you have to be is more important than a cyclist life	Please give us as wide a pass as possible
right of way issues	I'm visible	safe bike gear (lights, etc)
I am a vehicle, treat me like one	Watch for us!! were a lot lighter and slower than you	Learn the laws of the road as bicyclist have to obey the same laws as a motorized vehicle.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I have a family that will miss me & don't want to die.	Be diligent	Wait until it is safe to pass!
It's OK to cross the center line to give a cycle room.	Share the road	remember driving & cycling rules
I have just as much right to the road as you.	Don't pass me too closely	GIVE PROPER DISTANCE WHEN PASSING
We share the road	Pass at a safe distance from bikes	Being passed with only 6 inches of clearance is scary
	We are moving slower so please be careful	Give more clearance as they pass
cyclists have the same rules and rights as motorists	Get off your cell phone / stop texting while driving	Most of us are motorist too.
Courtesy and safety extend both ways	slow down around cyclists-your car is a lethal weapon	Some bicyclists choose to cycle because of concern for air quality and the environment
do not beep	Your car can kill me	don't use cell phone when driving
more bikes mean fewer cars	Cyclists don't have the safety features that a car has. Be careful around them.	Don't honk.
	Give cyclist room	Don't blow your horn behind a cyclist
I have children!	Just give ample room	be careful when passing if you have wide rear view mirrors
Share the Road - its the law	STOP when you don't have right of way	Don't expect me to take a pothole for you!
	that the roads are for all to use	Do not pass us with oncoming traffic
don't buzz me when you pass	I may not see you behind me	feel free to pass us, just give us a bit of space
share the road	If more people would ride a bike instead of a car, the roads would be much more pleasant.	Be patient
slow down	Don't blow the horn when you're right behind us	Pay attention to your driving.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

be aware of the Bicyclist on the road	Share the road	Share the road
Bikers belong on the road too.	I can't travel as fast as you can	Cycling will help you lose that belly fat (which will lower all of our health insurance premiums)
Give us a little more space.	Pass when it is safe	expect to see bikes around every turn
Bicyclist are equally entitled to use the roadways	Cyclist don't know when autos are making sudden lane changes	It's not cool when you flick cigarette butts and stuff at me, but I guess it's not cool to flick them at ANYthing.
we're not here to intentionally piss you off	Yes, we do pay taxes for road use.	
Share the road	they should understand that they are just as liable as if we were driving a motorized vehicle	
I'm a vehicle	safe cycling with traffic	
Share the road	don't cut us off when changing lanes or at taking off from a stoplight	
give us room when driving around us	Cyclists have the same rights as motorists	
We share road space	look for cyclists	
Pay attention to cyclist hand signals	UNDERSTAND WE HAVE THE RIGHT TO BE ON THE ROAD	
I have a right to be here	We can't slow down as fast as they can	
Share the road	Slow down.	
We are courteous to drivers	FOLLOW TRAFFIC LAWS	
Slow down	Do not blow horn as they pass	
we need a 2 ft distance between	Be respectful when passing.	
three feet of space	Pay attention	
don't be in a hurry	Be patient	
Give cyclist three feet of space, even if it means waiting to pass	share the road	

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Cyclists are vehicles that deserve their part of the road.	Bicyclists are not all convicted felons or have lost their drivers license and/or cannot afford a car	
Share the road	leave the anger home	
Slow down instead of squeezing through when there is oncoming traffic	Don't come too close.	
LOOK BOTH WAYS when crossing an intersection.	It's OK to pass carefully	
how to pass a bike	be careful passing when pulling a trailer	
I have a right to the road	Slow down when passing and give me at least 24"	
Cyclists are to be treated as any other moving vehicle on the road	Give us room	
Please give me some space	please don't run over us	
they should hang up the phone and drive	Do NOT blow horn as this is often scary	
It's scary when you speed by and try to crowd us	Pay attention to your driving.	
Share the road	Do NOT blow the horn behind us	
I have the right to be on the highway	Share the road	
Get off the phone and pay attention	Motorist gasoline taxes do not directly pay for road construction or maintenance so they have not "paid for the roads" any more than cyclists	
Everyone should cycle to understand	share the road	
Yes, we do have the right to use the road.	The speed limit in residential neighborhoods is typically 25 mph. Thanks.	
they must look for us		
safe cycling paths point-to-point		
Pay attention, quit using the phone		

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

be aware of your surroundings		
Slow down, wait until it is safe to pass		
take it easy at intersections		
DO NOT PASS ON TWO LANE ROAD		
Road can be respectfully shared by both		
Treat us like cars		
Patience in passing a cyclist		
We can't accelerate as fast as they can		
Give bicycles the right of way.		
MAKE SURE BICYCLES KNOW YOU ARE THERE		
We have the same rights to be on the road		
Most of us are not out to make motorist feel guilty about enviro issues.		
Give us room		
I try to stay to the right as far as I can that I am a vehicle		
treat cyclists with respect		
Bicycles are considered vehicles used for transportation		
pass normally		
Don't pass and then turn.		
We need 3 ft. clearance		
do as wide a circle around us as possible		
don't pass too close		
SHARE THE ROAD!		
Watch their mirrors		
that we have the right to ride		
Keep distance from me when passing		
I'm here, I am traffic, and you can share.		

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Give us some space		
Share the road		
By law, cyclists have the same rights to use the road that motorists do		
Patience		
don't use cell phones while driving...stay alert		
DON'T "wave me" through anything if I've paused for a moment to sip some water or something. I just want you to KEEP DRIVING.		
Thank you for sharing your road with us.		

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

<b>Question 30: As a motorist, what are the top three things or messages you would like cyclists to know?</b>		
<b>1</b>	<b>2</b>	<b>3</b>
Not all motorists are out to kill cyclists, even though it often appears that way.	Obey all traffic laws if you share the road	You're smaller. get out of the way
Wear a helmet	Act like a car, that's where I'm looking	move over to side of road to allow vehicle to pass
Obey the traffic rules.	use of mirrors/hand-turn signals	be respectful
be aware of vehicle presence	look and be prepared	Wear a helmet
share the road	Follow rules of the road	Many drivers still think of bikes as toys that have no place on the road.
stick to bike routes or roads with margins wide enough to stay out of middle of road	All cyclists should wear a good helmet and reflective/safety gear.	Learn how to change lanes properly by scanning, signaling and moving when okay to do so
Ride in a straight line	Ride smoothly; learn to scan over shoulder without swerving	the guy with the most metal wins
Cyclists are safer when they obey traffic laws and will be respected more.	obey stop signs and traffic signals	Use bike lanes if available
Obey all traffic laws: including stop signs	Make yourself visible	Hang up the cell phone
you are not a car, but still need to follow all street rules	motorists have rights too	Have good control of your bike (wobbling, weaving are road hazards).
Obey traffic laws	Pay attention to the traffic	Do not ride on the wrong side of the road - regardless of your lack of cycling experience.
ride single file on busy streets	I'm going to drive around you when you're going significantly slower than the speed limit.	wear safety colored clothing, be visible
Wear a helmet!	Do not blow through stop lights.	Ride in single file.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Stay off of winding roads as it's hard for everyone involved	follow safe riding practices	I will respect your right to travel on the roadway.
Obey traffic laws	It shows when you are not comfortable in traffic. Until you comfort level increases, stay on roads that have less traffic.	don't pass stopped traffic
motorists deserve respect	Please do not ride through stop lights are between lines of traffic that have stopped for a red light.	How about using some hand signals, including stop signals, and calling out so people can hear you?
	I care	Please be aware. we are everywhere
Stay on the side of the road so I can pass.	Give hand signals when planning to turn	If you are moving at traffic speed, obey road rules
Do not ride in the middle of the road	single file	give signals
Know the road rules and use them.	You are a vehicle, and you have to stop, not run lights and signs.	Understand that to widen routes for accommodations it takes money and property that may relocate families.
Don't weave in your lane! It makes it hard to get around you and makes you easier to hit!	Please be aware. we are everywhere	Children need to be taught how to ride on roadways
When in groups of two or more, use a _ _ _ _ _ pace line when cars are trying to pass.	If you are not moving at traffic speed, ride as far right as safely possible	as a slower vehicle stay to the right
be sensitive to speed differential / don't hog road	some roads are better than others to ride on	I will treat with you respect and with regard to your safety
Be predictable.	Funding to improve routes should be used to improve now, not build a fancy design that takes years to get the funding for.	Don't expect space when riding on busy two lane roads.
Obey the same traffic laws a motorists	Obey the traffic signs just as I do.	Stay to the right of the lane so that cars can pass at an appropriate time/distance

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Bike on!	Always signal your intent to turn or change direction	personal safety issues such as helmets, etc.
Comply with the rules of the road	make sure you are visible	
obey the traffic laws	/SPREAD OUT WHEN I NGROUPS	Let me know if you are going to turn or stop (be predictable)
You should be on the same side of the road as cars.	You have the legal right to be on the road	Signal where you're going
Please be aware. we are everywhere		Signaling does help
Cyclists should get equal treatment, not special treatment	Wear visible clothing	I don't mind slowing down behind you so don't freak out.
be conscious of blind spots	Obey all traffic laws	Ride single file
Be patient, we live in a vehicle dependant society, it takes time to shift to a more pro-bike society	Follow the laws of the road when cycling on roadways	NA
Don't be pushy; allow me to pass you safely	existing rules of the road	Please don't assume that I see you.
	Follow traffic rules.	Try to let us pass when you can
Give autos respect by moving over as far as you can.	Avoid long pace lines	On uphill's - stop and let cars pass if a long stretch
Traveling on sidewalks for extended distances is dangerous	Multiple riders should ride single file, close to shoulder. Don't take up the lane	Don't assume
obey the traffic laws	Not to run through stop signs/red lights, disregarding signs makes an accident more likely	Where a helmet.
STAY CLOSE TO EDGE OF [AVEMENT	be aware of traffic around you	Even if the driver IS an asshole, if there's a collision, you lose.
They must obey traffic laws, too	follow the rules of the road	
Ride predictably	Give us clear signals on your attentions	Please follow the laws of the road.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

You should obey the rules of traffic and not cut in between cars or down the sides of stopped traffic	NA	GIVE CARS AS MUCH PASSING ROOM AS POSSIBLE
A vehicle weighs much more than a bicycle. Be careful!	Please wear lights when riding at dusk	Be considerate.
You are not above the law	We often don't see you	If you are biking into the sun, I'm probably catching the sun's glare and may not see you.
Use hand signals when you are turning	Wear bright clothing and blinking light at dusk	oh am I still driving
awareness of presence	Look	Ride predictably
Pay attention to young drivers.	No 4, 3, 2 abreast when I am behind you	With proper road improvements, cars and bicycles can coexist.
Ride single file as far to the right as possible	Act like a vehicle.	Obey all of the traffic laws
Ride on the correct side	Being on a bicycle doesn't make you morally superior to people in cars.	Be respectful of motorists. Don't abuse your right to be on the road and make the rest of us look bad by being a jerk.
What to do to make sure they are visible	Wait your turn at traffic lights	Please tell people what you are going to do on the greenways
use the designated spots for biking	You need to have lights on your bike when you ride at night.	don't ride in the middle of the street
be visible	Stay to the right of the lane if going slower than traffic.	signal
	RIDE SIGNAL FILE IN TRAFFIC	Motorist want cyclist to wear high visibility clothing.
Know traffic laws	Ride single file.	Full body armor not nec, helmet is
NA	Wear colors that make you more visible - if I can't see you, I might accidentally hit you.	Obey the traffic laws (stop and yield signs)

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

You are invisible to us	talk talk talk	Flashy lights are more visible!
Please make it easy for me to pass you; I want to give you a reasonable berth.	Stay to right, move to single file to let car pass	Don't trust motorists--try mountain biking :)
Please ride single file on busy roads.	Give cars opportunities to pass when on group rides	I may not actually see you!
We don't want to wait from you	Big groups make it difficult and dangerous to pass	Sorry for polluting the air.
Ride single file	Cyclist must ride the same side of the street as a car. Not opposite like walkers or runners.	ALL CYCLISTS NEED TO WEAR A HELMET
	be attentive	Don't weave around the road.
Learn the laws	Quit riding side by side	Use Single file and rear view mirrors
Be mindful	don't ride in front of cars	Cyclists' negative actions affect all cyclists.
follow road rules	pull over	Use lights at night
	Motorist want cyclist to use signals to let them know what they are going to do.	It's not about you all the time.
Obey traffic laws (stop sign)		I will pass you if there is enough room
Obey the traffic laws.	It's hard for me to see you at dusk	Respect all users of the roadway.
You have to obey the traffic laws like everybody else.	Ride in a straight line where possible	don't ride on roads with no shoulder
Stay to far right in lane	You can't always be seen	Do not ride into traffic
Riding two (or three) abreast on public roads is rude (and probably illegal).	Use proper reflectors/lights	ride properly in mixed traffic
Traffic Laws are for bicyclists too - if on street.	Wear a helmet.	signal
Share the road	Bike lanes here are used as just another passing lane	Use reflectors
OBEY TRAFFIC SIGNALS	Give clear hand signals	Taking the whole lane or riding 2 & 3 abreast is not good riding etiquette

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Obey the traffic laws.	I won't run you over	You should be wearing a helmet and have proper lighting
Practice bike safety and don't just come out from a side street or into an intersection without stopping/slowing down.		Get a mirror for bike or helmet
I'm in a hurry	OBEY TRAFFIC SIGNALS/SIGNS-SIGNAL YOUR INTENTIONS	be predictable
Follow all the traffic rules	obey traffic laws	Use hand signals or make eye contact with me.
Ride single-file on busy roads	Don't run red lights	I admire and respect your ability and fitness
Don't ride side by side	obey traffic signals	signal so motorist knows what to expect
You must follow the same laws as motorists.	Wear a helmet and buckle that helmet!	I see you.
share the road	Obey the traffic laws	you are not special because you ride a bike, so do not act as such
If you're going to run a stop sign do it with caution	Weather related cautions	wear helmet
Keep up to riding	Bicycles are vehicles.	Be diligent of your surroundings
get over	Ride as far to the right as possible; get single file when a car approaches	Pack riding impedes traffic and we despise that
Motorist want cyclist to stay to the right side of the road.	They need to get where they are going.	Always be visible, not just with lights but clothing as well.
	I will try to not "run" you off the road	Be nice/show thanks when drivers thoughtfully yield/give you the right of way
Please don't ride two abreast in front of me.	Obey traffic rules.	be visible
Use the streets as a car would	don't ride in the middle of the road	you are hard to see
Be alert	Do not run stop signs	Stop signs apply to you, too

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Ride with traffic not against	Be courteous to motorist	Curb the attitude
When a car is coming, move over!	go single file	Share the road
Don't trust motorists even on straight wide roads	Use lights at dusk/night	Don't hog the road
Please ride on the right side of the road	I'll accommodate you, but you need to be predictable	Lack of room on roadways for 2 autos passing & a bicycle
	I know you are there and am sharing the road	Say thanks for courtesy
Ride single file	Do not use iPods etc while riding.	Don't wear headphones - you can't hear the traffic warnings/horns.
I value your presence on the road	share the road do not hog	Thank you for cycling!
	Try not to hog the road.	WEAR HELMETS, RIDE ON RIGHT SIDE OF THE ROAD AND ALWAYS USE A MIRROR
WEAR APPROPRIATE CLOTHING/HAVE APPROPRIATE LIGHTING	visibility issues	let cars pass whenever possible if you can't go the speed limit
Share the road	use lights at night	Obey all laws and signs
Obey the laws	You are a vehicle; behave like one in every way.	Don't ride in disregard of traffic laws. Use signals.
know the rules of the road	Single file, please.	Loose the I have the right to be hear attitude
Please don't run stoplights because it projects a bad image on cyclist	stay to the right, ride single file	Don't assume that I see you
Be conscientious of the cars - don't cut in front of us	hard to see you	Be respectful.
Bicyclists must follow all traffic laws just like cars.	Help me keep you safe.	be predictable
Visibility	Please obey the traffic laws and don't give us a bad rap	RIDE IN SINGLE FILE IN HIGH TRAFFIC AREAS! Be respectful!
	take as only as much of the lane as needed	Obey all traffic laws.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Obey the law!	wear bright clothing	I would rather be talking on the phone
Ride lawfully!!	respect the car drivers	be courteous
We have EQUAL responsibilities	Use hand signals all the time.	Cyclists better be the defensive drivers because motorists can kill a cyclist seemingly without repercussions by simply using the "I didn't see him/her" defense
Don't impede traffic.	Use lights after dark	use lights at night
I will be careful when passing you	Ride on the same side as traffic	I'm jealous of you guys who never, ever have to get behind the wheel of a car. I wish I were on MY bike right now, too.
When you blow through a red light it means u r unpredictable.	Wear a helmet!	Don't wear your "cyclist" outfit around other people after you're done riding. Go change.
Share the road.	Do not ride in the middle of a lane	
be alert	Share the road	
Obey the laws	Obey the traffic laws like everyone else	
Be visible	When traffic is behind you, especially on the parkway, don't intentionally ride in the middle of the road, that's dangerous.	
ride straight	If you want to share the road, don't assume right of way all the time	
Follow the traffic laws	move over at stop signs or lights to let me pass safely	
Use signals	Follow all traffic laws	
OBEY THE RULES (LIKE STOP AT STOPLIGHTS)	Pick a section of the lane and don't swerve erratically.	
There are rules to follow as a cyclist	Don't ride in very large groups	
Crazy Riding is not acceptable	signal your intent	

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

When riding in groups, ride in single file not side by side.	Try and stay to the right side unless turning left	
We care	You should move over to accommodate faster traffic when possible out of respect (being polite)	
stay in bike lanes	Don't ride opposite the direction of traffic	
ride only on roads designed to accommodate bicycles safely	Obey the traffic signs and signals just like drivers	
<b>WEAR A HELMET!!!!</b>	Share the road	
right of way issues	Obey the rules of the road	
	Use hand signals	
you are a vehicle, ride on the right side of the road	Motorist are nervous driving behind /beside cyclist	
If it is not safe to pass, don't invite me to.	Signal turns.	
Stoplights/stop sign apply to you.	they shouldn't expect motorist to bend over backwards for them	
Don't hog the road	Move over to allow traffic flow	
always follow the rules of the road	Do not pass in & out through traffic just because you have a smaller mode of transportation.	
Courtesy and safety extend both ways	Ride so that I can predict your behavior	
obey traffic rules	<b>RESPECT THE MOTORIZED VEHICLE</b>	
Be aware!	don't hog the road (no riding side-by-side)	
I see you	Obey traffic signs and lights.	
ride single file	<b>FOLLOW TRAFFIC LAWS</b>	
keep to far right	Do not ride side by side	

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

stay on the right side of the road	Hold your line of travel. Avoid erratic maneuvers	
Cars belong on the road too.	Don't wear spandex. Lance?	
Use a helmet	Understand that you are usually the slower traffic	
Cars are bigger than you, so be alert	Obey traffic laws	
sharing the road means bikes as well	ride single file	
obey traffic regulations	Stay to the side of the road.	
follow stop light rules	Allow motorists to make a right turn on red - don't block	
don't drive	if it is a curvy rode slow down so we can pass	
Try to ride on less trafficked roads	Be predictable! Signal well in advance!	
Don't meander in the middle of neighborhood streets as a group when traffic is coming	obey traffic laws	
Don't pass me on the right at stoplights	Pay attention to your driving.	
Stay to the right when sharing the road	our car is bigger than we think	
Don't take the attitude that you are the only ones on the road.	Obey traffic signs and lights	
Glancing and rolling through red lights is dangerous	Early morning/late evening rides are fine as long as the bike can be seen by having front/rear lights	
Use hand signals!	ride single file if no bike lane	
on busy roads, ride single file	I like you. :-)	
Share the road means sharing the road	Don't ride in the center of the lane. You have to "share the road" too.	
If you are traveling slower than the speed limit, stay single file for cars to get around. Don't ride side by side.		

Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Obey traffic laws		
stay right		
use hand signals and lights		
you need to obey the laws too		
I may not know where you are going		
You must obey the traffic laws		
Don't ride at night without lights		
Don't take the whole road		
Share the road		
Move to the side and not slow traffic when possible		
Bright colors		
Turn signals are a must		
Please travel single file, makes it easier to pass you and give you more room and not run head first into another car coming the opposite way.		
Follow the traffic laws.		
Obey the law or get off!		
Wear a helmet!		
Don't hog the road		
There are blind spots - take this into consideration		
Use more/better lighting		
I am not gonna		
RIDE IN SINGLE FILE		
Wear a helmet and reflective gear		
Don't cut in front of me		
Pay attention to what is behind you		
Stay off of main roads at rush-hour		

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

You have to follow the same rules as motorists.		
Ride single file.		
CARS ARE BIGGER THAN BIKES		
Stay as far right on the road		
Respect motorists when traveling in groups.		
Sorry, I like to text while I drive.		
Please move over where you can so traffic can pass		
that they should wear helmets		
do not ride double		
Drive your bike predictably		
wear bright jerseys		
Hold your line.		
Stay to the right		
never ride two abreast		
ride single file to the right		
Obey ALL laws and signs just as you were driving a car!		
Stay straight do not wobble		
please ride in single file		
obey traffic laws		
Obey all traffic laws, anticipate what others are doing		
we are stupid and like to drive off the side of the road		
Ride single file in groups		

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

By law, cyclists have the same responsibility as motorists to obey traffic markings and signals		
don't hog the road		
If you're holding up traffic, MOVE someplace else! Don't make a bunch of cars furious just so you can make a point.		
Get out of the way. Stay off roads where you don't belong.		

<b>Question 31: Please rate your level of interest in following bicycle programs or activities. Comments.</b>
Many police officers I've spoken with aren't even aware of the laws regarding cyclists.
Education of bus drivers on assisting riders with bike racks
INTEGRATE THE SYSTEM
Public education about Road, Greenway etiquette
Teach pedestrians how to safely share a bike trail. They cause many near accidents.
dedicate majority of funds to separate bike lanes and paths
Programs geared towards safe riding for children and teens are desperately needed
more emphasis on mountain biking mill mountain trails
connect greenways please
Automobile drivers just don't get it, and older drivers are so afraid to deviate from their line in the lane, that I wonder if there are any solutions.
Who are you incentivizing??
True dedicated bike lanes
Pedestrian rules on greenways - which side to walk on, language of coming cyclists
Adopt a Bike Lane Program
What is an incentive program?
police should allow cyclists to treat stop signs as yield signs on quiet streets
A monthly ride to raise awareness of cyclists.
As long as the enforcement includes motorists also.
Safe Routes to School plan implemented; Complete Streets policy implemented
Regional cycling trips
Enlightened real estate development patterns.
Education for Cyclist/Motorist will only be preaching to the choir, the worst offenders will not be in the classes

**Question 33: Other comments or suggestions:**

Why is it they have made little or no effort to let the public know about these programs?

You're not doing a very good job of informing those of us who choose not to join clubs, wear spandex, or cycle in large groups.

I pull a Burky w/ my bike so I can take my children and worry about motor vehicle awareness and the safety of my children.

I use bikeways and greenways to walk my dog. I would love to see them expanded as I enjoy them too.

I don't own a bike

Wish I knew if it was legal to ride the sidewalks. Some still don't have ramps at crossings though. If it is legal to ride sidewalks and they were limbed up higher and swept I would use them.

discounts on water for avid bicyclist city and county wide

Completion of the Roanoke River Greenway should be a top transportation project priority for the Roanoke Valley. If one travels to cities with lengthy trail systems typically these trails are used extensively and are a good tourist attraction for families. The greenway would be a good marketing opportunity to attract visitors to the valley and enhance the quality of life of current residents.

I would like to see connectivity between the Smart Way buses to the Valley metro system other than downtown ROA. Example. I work on Harrison Ave in Salem and could ride the Smart Way Bus to just off Exit 140. The nearest Valley Metro bus comes up Main St Salem. It would be nice in the event it rains that I could coordinate my commute with the bus system to get to work. Currently that option is not there and therefore I am hesitant to use commuter options because of it.

Red Lane is a relatively minor upgrade to add paved shoulders from Carlton to the end which would greatly benefit all of the residents in the area. It's also Possible the Old Baptist Children's home may even allow an alternative route to go through some of their property.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

Very disappointed that recent repaving projects ignored cyclists completely and even made conditions worse: Repaving of Brambleton/Bent Mountain Road eliminated shoulders for bikes; with 5 lanes for traffic available, there was ample opportunity to incorporate bike lanes in both directions. I have no choice but to ride on this road, but feel that it is very unsafe. Grandin Road/Memorial Ave. improvements missed opportunity to incorporate bike lanes. Riverside Road in Salem to Greenhill Park should have priority in incorporating bike lanes or wider lanes to accommodate bikes. This road is heavily used by cyclists of all abilities and is used extensively by motorists as a commuter pathway.

Generally, I'm pretty comfortable riding on streets with a fair amount of traffic. My biggest concern is negotiating intersections where, as a bicyclist, I have to cross traffic to get in the correct lane. Education for bicyclists and motorists on these situations, I think, is the most important area from a safety perspective.

Do we ever get this information sent to us via mail? that would be helpful

I see there is a lot I don't know about bicycling and transportation planning!

On #15 the fact that shade trees minimally influence my route decisions only means that factors like time and distance are on balance more important. The absence of spreading street trees to shade asphalt is a major impediment to routine use of a bicycle for transportation in the summer. Roanoke city is bad enough but the county is total sewer in this regard. On #26 your road building bias is showing. Corridors that aren't safe for bicyclists need to be downgraded not upgraded. The reason that they are not safe now is because the morons at VDOT over-engineered them in the first place. For example, on Melrose Ave. the worst feature is the intersection at 419. That miserable ocean of asphalt is totally intimidating for someone on a bicycle. The intersection at Peters Creek is not much better. On #27 the main problem with Valley View is not so much access to the place as it is safe circulation once there. Concerning the other destinations, who knows what routes to use to provide connections. The major connectors in this part of town are a total automobile only nightmares. Hershberger Rd west of Williamson is the main problem, with Peters Creek being a close second. And 581 is a total barrier. On #31 I support a public awareness campaign only if it includes motorist responsibilities. Motorists must be educated about their legal obligations vis-a-vis bicyclists (e.g., min 2 foot clearance on overtaking). I strongly support student education programs but only if they are aimed at creating competent cyclists who can share the road with motorists, not if they aim to reinforce the bicyclists as second class road users message. Concerning education for cops, the only time I have been struck by a motor vehicle I had to explain the relevant state law to the cop. I have also been told by the cops in Roanoke County that in a bicycle car accident they will not charge the driver unless they personally witness the accident.

Stop talking and start building. We are too far behind in the Roanoke Valley. We're known for our hiking trails and fishing streams, but we need additional healthy means to get out and enjoy it all (aka cycling).

Roanoke Greenway is great. Very nice asset to the area is always busy. Change the SE 13th St parking entrance to the side street so drivers can park from either direction. Put up lots more share the road signs.

No commute to work - work at home

## Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update

Bicycling is one of the keys to making Roanoke an actual outdoor destination. We need to be cyclist friendly, and runner friendly. Local leaders do not understand the difference between greenway cycling and road cycling. Please be sure they do know. Having said that, continuous miles of greenway can be a destination attraction, but it needs to be more than 10 miles to attract serious cyclists. The New River Trail is 50 miles and serves as a destination attraction for people from out of state. Plans to link all the Valley greenways could well create the same option. I would enjoy that -- but again Greenways should not be seen as a replacement for safe road riding.

Retired. Would be glad to help with educational programs.

I would like to know more!

Valley Metro needs racks on all their buses! I can't count of them!

I've not really heard of any of the above.

I don't ride much now due to family obligations but cycling is in my blood and I plan to start commuting more in the future. It would be great if Virginia could adopt the "Stop" as "Yield" rules similar to Oregon where a cyclist only is required to slow at a stop sign and yield but is not required to come to a complete stop if not necessary. Oregon has a similar law and it has been shown to be safer for the cyclist. It would be great if major roads had paved shoulders that were available for cyclist. Next time I buy a home I am looking for a house located close to a greenway or recreational/commuter friendly road. I live on a fantastic rural road now but am cut off by US220. More park and ride locations would be nice and they should be bike friendly (i.e. close to major roads and bike routes and have covered bike racks). The Parkway really needs to provide sidewalks on-ramps at intersections where recreational users may want to get on it. Places like Yellow Mtn Road, Bandy Rd, 116, Rutrough Rd/Highland Rd, Buck Mnt Rd, Starkey, Cotton Hill, etc. I understand limiting automobile access but why are they also limiting its access to recreational users? While we're at it lets put a greenway along the parkway in the RVAMPO (I know it's a long shot but someone needs to bring this up to the State).

I think it's great that you're doing this!! I look forward to positive improvements for our region.

For what use is this really going to be used? I lived in Roanoke and these things have been talked about for years without any action. These conditions/problems exist in most communities. Law enforcement and punishment are key elements in providing safe streets for bicyclists. Accommodations and education are other key elements.

I love to ride my bike for exercise and stress relief. I would love to see more greenways and to see the green ways linked so I can ride farther. But pedestrians tend to cause me to only use the green way as a way to get to Mill Mountain where there isn't "foot traffic" and I can ride without having to always say "on your right, left etc." I really hope green ways can be linked and shared by pedestrians and cyclists.

Glad to see the survey. Spend a few tax dollars and see how it's done right, in Portland, OR.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I do not bike to work because I live close enough than I can walk in 5 minutes. I would consider biking to work if I lived within 5 or 10 miles.

Thanks so much for doing this survey!

I am new to the area, I have not heard or seen a lot of info to support cycling

The current inverted "U" bike racks are difficult to recognize and cannot accommodate more than 2 bicycles at a time. The City should explore alternative bicycle storage systems that are functional and appealing. If Roanoke wants to tout itself as a bicycle friendly city, one of the most important initiatives should be to provide recognizable bicycle storage locations. Think "brand identity", the current racks say "these are the cheapest things we could find to serve the purpose of providing a place for someone to lock a bike. To get people interested and keep them interested in cycling around town (more than recreation) it needs to do/say more. Please don't misunderstand this as a call to slap advertisements on every bike rack around town. The bicycle storage locations need to have their own unique identity that reflects the city's commitment to cycling.

If VDOT were interested in safety instead of building and widening interstates, the world would be a better place. The traffic speed on Plantation Rd over a blind hill at ITT serves no utility for that little distance but may bury me yet. Roanoke City has become amazing! They make the county seem to be sleeping.

Thank you for putting together this survey. More visibility!

I think Roanoke has made great strides to becoming a more bicycle friendly city. The changes that have been made since I lived here 10 years ago are very apparent. I love the new greenways. In particular, I have spent a lot of time on the Murray run gw and the mill mtn gw. Every time I am on them I see other people using them. I think word is getting out and people really appreciate what the city/county/Salem are doing. I am in favor of any new greenways. I think they encourage recreation and promote bicycle commuting. Thanks for the hard work, keep it up.

Mutual respect or at least acceptance that cyclists and motorists are equally entitled to use public roads.

I would like to repeat how important the patrol of law enforcement on the greenways is. I personally witnessed a man urinating on, yes on, the greenway near Wasena park as pedestrians and cyclists went by. This was a Sunday morning and he was obviously hammered from Saturday night. I've had a cyclist also tell me they have been confronted by, what I would say are thugs, asking questions like how much is your bike worth or do you have any money. Some cyclists are riding bikes that cost in excess of \$2000 that would be very tempting for someone to take. In my opinion it's only a matter of time before someone is assaulted either sexually or simply for money or their bike. Some parts of the greenways are very secluded, particularly around Wise Ave by Indian Village, and something like this could easily take place. I would truly hate to see them pulling a body out of the river on the news over a bike.

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

I took this survey with most answers in mind, as of about two years ago -- before I found out I was pregnant and had the baby. Once I found out I was pregnant, I stopped riding (only because I had been struck by a motorist on Franklin road and did not want to risk it again while pregnant). I haven't been active recently because I stay at home with the baby and she is still too young to safely ride. So while my answers are "two years old", they are what I estimate would be my answers today, and in the future when I plan on riding again.

I'd be interested in attending meetings related to the further development/improvement of the Roanoke bike trails and system. I'd also be interested in participating in education programs.

I am not familiar with all the laws pertaining to bikes, so maybe my understanding is flawed. But it's simply not reasonable to say that the same road laws that apply to cars apply to bikes: they can't go as fast or accelerate as fast so they are passed on no-passing roads and at stop lights. Bikes are more similar to pedestrians than cars in terms of speed and size, so they should be able to cross at crosswalks (for safety reasons). I also think bicycles should be able to use sidewalks as long as they deferring to pedestrians and don't go faster than 15 or 20 MPH. There are many areas in the valley where there are sidewalks on streets that would otherwise be unsafe to bike on.

I just ride when I can and it is a good alternative to driving. I have to account for my schedule, what I'll be carrying, my budget (as to how well I can equip myself), and my other obligations. Overall, Roanoke is doing a great job.

Build off-street bike lanes. Build sidewalks. Let the rest take care of itself. I'd rather all the money go into hard, capital improvements than fluffy education campaigns that no one will pay attention to. People know what to do with bike lanes and sidewalks--just build the damn things.

1. Ban Horses from Carvins Cove 2. Allow bikes on all Mill Mountain Trails 3. Publish Trail Etiquette Literature (Bikes, pedestrians, etc) 4. Host Events (duathalons, etc) on City Trails 5. Identify Single Point of Contact/Authorized Agent/Site for Trail Information. Info is everywhere. What is credible?

none

Roanoke Valley elected officials need to walk the talk and work to YES to make Roanoke Bicycling Friendly.

All these above I have not heard about and I cycle 12 months a year...why have I not heard about them...who should be telling me as a taxpayer?

I am a fan of wider roads in order to share the road. With bicycle lanes that are designated bike lanes on the regular street all the debris (rocks, gravel, twigs and glass) get push there so I end up not riding in them anyway for fear of a flat.

There needs to be much more education in the valley for motorists and cyclists!

Just moved here from Charlotte, NC. If no bike lanes then how about road shoulders wider than 3"

**Bikeway Plan for the Roanoke Valley Area MPO - 2012 Update**

This is not complex. 1) Sprawling development patterns is the underlying problem. 2) Planning a viable city is the solution. 3) Manners solve most problems on the road. 4) Outlaw cell phone use on the road.

Roanoke has a tremendous opportunity to attract people with bike paths/greenways. The quality of life is greatly improved with these facilities. When I ride on the Rivers Edge greenway there are always people enjoying it. These people represent every demographic in the area. Make expanding the Greenways a top priority and move ahead with the projects at a rapid rate.

Current bicycle planning activities are more than adequate for the small number of cyclists.
